Product Engineering

McGRAW-HILL MAGAZINE OF DESIGN
RESEARCH AND DEVELOPMENT

VOLUME 28

INDEX

1957

MONTHLY EDITIONS	JANUARY TO AUGUST
WEEKLY EDITIONS	SEPTEMBER 9 TO DECEMBER 30
ANNUAL DESIGN DIGEST ISSUE	MID-OCTOBER

Subject Index	page 2
Author Index	page 12
Design Digest Contents	page 14
Special Reports	page 16

Index includes editorial content of monthly and weekly issues: feature articles and special reports, Developments to Watch, Perspectives, Editorials, Product Designs, Mechanical Spreads, Reference Book Sheets, and featured items in Technical News, New Components and Abstracts.

Copyright 1958 by McGraw-Hill Publishing Co., Inc.

—A—

Actuators, Hydraulic

Transient response of hydraulic actuators. E. Mucha....Apr. 175

Adhesives

Ceramic adhesives for elevated temperatures ....May 166
500-F adhesive for stainless steel (SP) Sept. 23 44
Metallic fillers don't affect thermal resistance of adhesive bonds made with phenolic-epoxy resins (D) Oct. 21 6
Selective adhesion opens new horizons (D) ....Sept. 16 9
Single-component epoxy adhesives. Bernard Gould ....May 164

Aeronautics

A-plane down but not out (N)..Nov. 25 107
Air Force sights in on next decade's production problems (N)....Sept. 16 114
Aircraft runway cleaner (PD)..Nov. 25 92
Aircraft stall warning (PD).....Aug. 160
Aircraft tire (N).....Nov. 4 24
All-electronic landing system (N) Oct. 28 90
Army contracts for aerial jeep (N) Sept. 9 29
Balance mechanism like that in the human inner ear will be used to detect the slightest variation in the position or speed of a missile or manned aircraft (D).....Jan. 9
Bomber lead times compared (N) Dec. 30 25
"Clamshell" gives jets powerful braking action (N).....Dec. 30 23
Doppler effect, guides planes, tracks Sputnik (N) ....Nov. 18 15
Electrogravitics: science or daydream? (N) ....Dec. 30 12
Electronic simulator for jet airliner (N) ....Nov. 11 117
Emergency floats boost copter cargo capacity (N) ....Sept. 16 115
Honeycomb cushion for combat airdrops (N) ....Oct. 14 112
Hydraulic system redesigned to reduce weight (PD) ....Apr. 152
Jet blast fences (N).....Dec. 2 27
Lockheed Electra throttle controls are self-locking (PD) ....Nov. 25 94
Mechanical pitch change for big propellers (D) ....Oct. 7 6
Midget jets (N) ....Dec. 16 19
Mirror landing device is lifesaver for pilot (N) ....Sept. 16 118
Projector simulates helicopter flight (PD) ....Nov. 11 92
Revolution in war material (D)..Sept. 9 11
Target drones aim at sound barrier (N) ....Sept. 30 116
Thermal problems may not be quite as rough (D) ....Sept. 23 6
Transportation Aircraft Test and Support Activity (D).....Sept. 9 11
Windshield television for pilots (N) Nov. 4 21
Wing structure holds fuel (PD)...June 162

Aluminum

Aging of some aluminum alloys (A) July 366
Aluminum eyes auto market (N) Dec. 23 90
Aluminum parts that stand 930 F (D) Dec. 16 12
Anodized aluminum molds make castings as strong as forgings. C. A. Parianti ....June 170
Army studies switch to aluminum for unitized jeep bodies (N).....Oct. 28 87
Color and textures for aluminum. R. V. Vanden Berg ....Sept. 30 101
Continuous-cast, continuous-rolled aluminum rod (D).....Oct. 7 13
Design for aluminum—suggestions for automotive designers ....Aug. 175
Enameling aluminum (D) .....Sept. 9 6
Fatigue and internal friction of aluminum (A) ....July 258
High-strength aluminum casting alloy (D) ....Mar. 9
Hot-dipped aluminum coatings. H. L. Kee ....Oct. 28 57
How irradiation effects aluminum alloys. Dr. H. H. Hausner.....Apr. 169
Impact extrusions. Nicholas Marchak Nov. 25 72
Kaiser orders super-strong plate stretcher (N) ....Sept. 30 116
More aluminum for Detroit's autos (N) ....Dec. 30 24
More aluminum in cars (D)....Dec. 23 9
New aluminum forging alloy. Warren Bomhardt ....Dec. 23 62
Small users of aluminum may be in for a break (D) .....Oct. 7 11
Strong aluminum plate made for structures (N) ....Sept. 9 19
Subway cars of aluminum, in Toronto, Canada (N) .....Sept. 9 28
Switching positions with copper (D) Sept. 23 18

Amplifiers, Magnetic

Alloy improves magnetic amplifiers (D) Mar 9
Miniature relay-amplifier combination (C) .....Sept. 30 127

Appliances

Beverage and batter mixer (T)..Oct. 7 32
Explosion-proof polishing and scrubbing machine (D) .....Sept. 23 8
Food blender—non-metal parts featured (PD) .....Oct. 28 65
Refrigerator has 3 temperature zones (PD) .....Apr. 164
Sight-and-sound recorder (N)..Oct. 14 114
Spin drier which cannot cause radio or TV interference (D).....Sept. 9 13
286 million major appliances (D) Dec. 16 5
Vacuum cleaner (T) .....Oct. 7 23

Applied Mechanics

Analysis and design of air motors. O. E. Teichmann.....Feb. 167
Cams and gears join to stop shock load. Beggs & Beggs.....Sept. 16 84
Clock-escapement mechanisms. T. K. Steele .....Jan. 179
Computers simplify solutions of polynomial cam curves. Kloomok & Muffley .....Mar. 196
Diaphragm characteristics (A)....Mar. 402
Differential springs can simulate load. G. H. Logan.....Sept. 30 110
Elliptic-type closed curves. Worley & Breuer .....Aug. 141
Epicyclic gear train calculations. Conklin & Ballmer.....Apr. 186
Epicyclic gears for control mechanisms. J. W. Edgemond Jr.....Feb. 194
Flat spring material—costs and stress factors. J. B. Beckwith (RS)..Oct. 14 135
Flow rate of liquids through orifices. H. C. Lowe (RS).....May 223
Formability of flat spring material. J. B. Beckwith (RS).....Sept. 16 125
How much crown does a pulley need? W. A. Williams.....June 185
How to determine mass moments of inertia for irregular parts. D. M. Eliett .....May 184
How to find final dimensions of stretch-formed parts. Bruce Russell (RS) Nov. 25 121
How to find thickness of a constant-stress disk. J. H. Rowe (RS)....Apr. 211
How to measure principal stresses. C. C. Perry.....Oct. 14 101
How to reduce shock loads in bearings. R. H. Carter.....Sept. 16 72
Leather belts—Hp loss and speeds (RS) .....Oct. 14 123
Less noise from small engines. Kamo & Iwatsuki .....Nov. 25 95
Limitations on cam pressure angles. H. A. Rothbart.....Jan. 193
Lubricating with air—How to design hydrodynamic gas bearings. Ausman & Wildmann .....Nov. 25 99
Mechanical impedance (A)....Oct. 14 181
Power capacity of spur gears. Charles Tipiitz (RS) .....Aug. 215
Rapid weight-strength analysis of pressure vessels. R. E. Wong.....Oct. 14 95
Resistance of parallel circuits. Leo Fiderer .....May 221
Resistance to rolling and sliding (A) Sept. 16 192
Speed-torque analysis for complex mechanical systems. V. H. Seliger Feb. 179
Stress-concentration factors. Alexander Gomza (RS) Pt 1 June 211 Pt 2 July 215
Stress cycles in planetary gears. L. E. Iversen (RS) .....Jan. 219
Stresses in large ring bearings. T. S. Williams .....Feb. 160
Surge waves in compression springs. Karl Maier .....Aug. 167
Torque for slip couplings (RS)..Dec. 23 95
Transient response of hydraulic actuators. E. Mucha.....Apr. 175
Triflar pendulum and its applications to the experimental determination of moments of inertia (A)....Sept. 16 195
When splines need stress control. D. W. Dudley .....Dec. 23 56

Assembly

Grooves for retaining ring assemblies. Hugo Wurzel .....Jan. 158
How to design with shims. Thomas Barish .....Aug. 164
Machine pins gears to shaft (PD) Mar. 163
Probability applied to assembly fits. G. D. Pheil.....Nov. 25 88

Automotive

Aircraft influence (D).....Oct. 7 5
Aluminum eyes auto market (N) Dec. 23 90
Aluminum hopes to gain weight in each U S car—260 lb more (N) Dec. 30 24
Aluminum reinforcements for the GM Corvette (N).....Dec. 9 110
Army studies switch to aluminum for unitized jeep bodies (N).....Oct. 28 87
Automotive gas turbine will be optional equipment (D) .....Apr. 9
Autopilot for autos (D).....Oct. 28 9
Biggest truck ever built, anywhere (D) .....Dec. 2 15
Brazil's auto industry sprouting; parts makers needed (N) .....Dec. 16 21
Brazil is building its own autos (D) Sept. 9 13
Britain tries new approach to all-plastic car .....Nov. 11 113
British auto show dull—but sporty (N) .....Nov. 18 27
Bus floor is part of frame (PD)..May 174
Carburetor operates in any position (PD) .....Jan. 146
Chevrolet and Plymouth for 1958 (T) Nov. 4 30
Compression ratios of 12:1 are on the way (D) .....Nov. 18 8
Curtiss-Wright, Daimler-Benz—doubts settle on deal (N).....Sept. 9 31
Design for aluminum .....Aug. 175
Ductile iron wheel halves cost. H. A. Peller & others.....Aug. 162
Edsel's hat goes in the ring (PD) Sept. 16 86
Europe's new cars stress safety, comfort but price hike looms as market booms (N) .....Oct. 21 22
Elevator truck van reduces load-unload time (N) .....Aug. 201
50-miles to the gallon aim of British auto makers (D).....Sept. 23 15
Ford combats knock with shock (N) Oct. 14 114
Four major metals in the future automotive industry (D).....July 9
Four-way disaster vehicle (PD) Oct. 14 80
Free piston turbine engine tractor (PD) .....July 154
High-volume trailer has thin, rigid walls (PD) .....Feb. 146
Lift-truck for long hauls (PD) Oct. 14 85
Lift truck steers hydraulically (PD) Sept. 16 89
More aluminum in cars (D)....Dec. 23 9
Motorcycles—more horsepower per pound (D) .....Sept. 9 13
Multi-cylinder supercharger (PD)..July 158
Power motor of the future.....Oct. 28 84
Power unit swivels—reverses drive (PD) .....Oct. 28 62
Product design—key to smog control (N) .....Dec. 9 106
Reinforced plastic shell forms car frame (PD) .....Feb. 152
Rigid X frame has tubular center (PD) .....Apr. 158
Russian auto engineers use plastics (D) .....Dec. 16 12
Safety first, style next (N).....Nov. 11 114
Seat belts (but who uses them) save lives (N) .....Sept. 9 29
Solar-powered autos (D).....Nov. 11 9
Soviet engineer discusses auto design Nov. 11 111
Suspension combines plastic pads with rubber bellows (D).....Dec. 30 10
Track links drive pontoons (PD)..May 177
Trailer houses generating plant (PD) Mar. 158
Vacuum actuated pin meters fuel (PD) June 163
Whither auto design. Felix Giordano Nov. 11 106

—B—

Batteries

Batteries use solid wax electrolytes instead of conventional materials (D) Dec. 2 8
Dry battery with probable life expectancy of ten years (D).....Aug. 9
Miniature dry battery (C)....Nov. 11 129
New batteries from Australia (D) Sept. 23 15
Solar batteries (D).....Sept. 9 6
Solar-powered autos (D).....Nov. 11 9

Bearings

Ball bearing takes linear, rotary or combined motion (SP).....Oct. 7 39
Ball fatigue (A).....July 370
Bearing raceways improved; production automatized (N).....May 207

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorials. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

Disturbances due to bearing oil films (A) ..... May 415
How to design ball bearings for water lubrication. P. R. Eklund ... Oct. 28 72
How to reduce shock loads in bearings. R. H. Carter ..... Sept. 16 72
Hydrostatic bearing supports thrust and radial loads (PD) ..... Jan. 156
Internal load reaction in rolling bearings (A) ..... Nov. 25 174
Lubricating with air—report
Research focuses on gas bearings. Nicholas Chironis
How to design hydrodynamic gas bearings. Ausman & Wildmann
Nov. 25 99
National Motor Bearing solves design problems by computer ..... Nov. 4 36
New oil-less bearing material. Shaw & Knopp ..... Jan. 203
No-lube bearings (D) ..... Oct. 21 10
Oil seals to provide positive lubrication on large or high-speed thrust bearings (A) ..... Aug. 320
Precision-machined balls (D) ... Sept. 9 8
Prediction of journal-bearing temperatures by the application of heat-transfer theory and data? (A)
Sept. 16 192
Preloaded bearings align chuck (PD)
Sept. 16 89
Self-lubricated bearing with teflon-glass liner takes loads to 60,000 psi (C)
Sept. 16 129
Simplify design with multi-function ball bearings (MS). H. L. Potter
Sept. 16 122
Spherical bearing (C) ..... Jan. 225
Standardize and save (N) ..... Sept. 30 112
Stresses in large ring bearings. T. S. Williams ..... Feb. 160
Temperature effects in journal bearing lubrication (A) ..... Feb. 316
Timken design turnabout saves everyone money (N) ..... Sept. 23 29
Water bearings and air bearings (A)
May 398
Water-lubricated fluid-film bearings are practical. Stanley Abramovitz
Sept. 30 74
Wire insert simplifies bearing adjustment (PD) ..... Oct. 28 65

Belt Drives

Foam-faced belt for cigarette packaging (D) ..... Oct. 21 6
How much crown does a pulley need? W. A. Williams ..... June 185
Leather belts—hp loss and speeds (RS) ..... Oct. 14 123
Self-centering conveyor roller (PD)
June 155
Two-speed press drive (PD) ..... Apr. 163

Bonding

Bonding of semiconductors and leads (A) ..... Oct. 28 168
"InterAct" process—new bonding technique (D) ..... Nov. 4 6
Sticking the stick-proof (D) ... Nov. 18 8
Stronger bonds between plastics and metals (D) ..... Oct. 14 9

Brakes, Electrical

Speed control with adjustable braking (SP) ..... Sept. 23 45
Stopping time and energy loss of a-c motors with d-c braking (A) .... Mar. 398
Torque motors and brakes. S. Noodleman ..... Apr. 146

Brakes, Mechanical

Expendable brake shoes (PD) .... Mar. 156
Wide-flange brake drum (PD) .... Aug. 151

Brazing

Vacuum and hydrogen brazing (A)
July 366
What's holding back titanium sandwich structures? (D) ..... Sept. 9 5

—C—

Cams

Cams and gears. Beggs & Beggs.
Sept. 16 84
Cams rock platen in functionally styled press (PD) ..... June 152
Computers simplify solutions of polynomial cam curves. Kloomok & Muffley ..... Mar. 196
High speed cam drives indexing table (PD) ..... Jan. 155
Limitations on cam pressure angles. H. A. Rothbart ..... Jan. 193
Linkages gain on cams ..... Dec. 23 75

Casting

Anodized aluminum molds make castings as strong as forgings. C. A. Parlanti ..... June 170
Cast urethane rubber. Kittner & Pigott ..... Sept. 16 68
Cermet casting (A) ..... Feb. 306
Ductile iron wheel halves cost. H. A. Peller & others ..... Aug. 162
Epoxy casting resins simplify three-dimensional photoelestacity. M. M. Leven ..... July 135
Epoxy castings. B. F. T. Langsdorf
June 135
High-strength aluminum casting alloy (D) ..... Mar. 9
How design affects cost of chrome-plated diecastings. D. H. Robinson
May 190
Magnesium castings can be welded without distortion. Mansfield & Genualdo ..... Sept. 16 94
Powdered glass gives mold for stronger castings. Youngs & Heymann .. Oct. 14 68
Quality and cost of magnesium sand castings. F. M. Giordano ..... Mar. 164
Redesigning castings to weldments. O. W. Blodgett ..... Mar. 135
Size restrictions can be removed from vacuum-cast parts (D) ..... Nov. 25 9

Ceramics

Ceramic honeycomb sandwich (D)
Apr. 9
Ceramic mirrors (D) ..... Oct. 7 13
Cerium sulfide (D) ..... Sept. 16 9
Cutting tool tips (D) ..... Dec. 23 9
Ductile ceramics? (D) ..... Dec. 9 9
Lower-cost high-temperature ceramics (C) ..... Dec. 16 5
New low-expansion ceramic for thermal shock. Herbert Schwartz .... Sept. 30 70
Nitride-bonded silicon carbide. W. L. Wroten ..... Feb. 135
Sprayed ceramic for radome construction (D) ..... Nov. 11 9

Chain Drives

High speed chain drives (A) ..... Jan. 359
25% narrower roller chain handles same loads (SP) ..... Nov. 18 46

Cladding

Cladding sheet steel with titanium (D)
Feb. 9
Special cladding technique for corrosion protection (D) ..... Dec. 30 6

Clutches, Electrical

Electromagnetic particle clutch in French cars (N) ..... Dec. 2 28
High-speed electrostatic clutch. C. J. Fitch ..... Feb. 189

Clutches, Mechanical

Clutch assembled automatically (PD)
Aug. 159
Clutch drive controls paper feed (PD)
Mar. 160
Metal shoes prolong clutch life (PD)
Oct. 14 82
Pedal-less clutch for English car (PD) ..... Nov. 11 95
10 ways to apply overrunning clutches. Mulholland & King Jr. (MS) .. Nov. 25 118

Color

Color and textures for aluminum. R. V. Vanden Berg ..... Sept. 30 101
Specification may be easier (D) . Sept. 9 5
What makes color preferences change? (D) ..... Sept. 23 5

Compressors

Compressed air for push or pull. Stewart & Moritz ..... Oct. 14 72
Compressor with modular construction (PD) ..... Feb. 158
Redesign cuts weight, inventories. Groser & Packer ..... Oct. 14 99
Stepped pistons simplify compressor construction (PD) ..... Jan. 144

Computers

Are computers oversold? ..... Sept. 9 40
British enter fastest-computer race (N) ..... Sept. 9 31
Computer analysis for hire (N) .. Nov. 4 26
Computers on the farm? (D) .. Nov. 18 7
Computers simplify solutions of polynomial cam curves. Kloomok & Muffley ..... Mar. 196
Digital computer specializes in engineering design problems (N) .. Oct. 7 25
Digital output-input translator system (D) ..... Feb. 9
National Motor Bearing solves design problems by computer ..... Nov. 4 36

Control Systems

Clutch drive controls paper feed (PD)
Mar. 160
Controls for multispeed motors. T. F. Bellinger ..... Feb. 183
Cooking temperature control (PD)
May 180
Discrete compensation of sampled-data and continuous control systems (A)
Feb. 337
"Dream" control data center for future skyscrapers (N) ..... Sept. 16 116
Electronic tracing systems control milling machines (PD) ..... July 150
Gripper fingers control paper in letter press (PD) ..... Dec. 23 74
New ways to indicate and control liquid level (D) ..... Oct. 7 6
Non-electronic numerical control (PD)
Dec. 9 84
Numerically controlled jig borer (PD)
Feb. 148
Over-under speed control (SP) . Oct. 21 42
Programming counter controls multiple switches ..... May 224
Remote controller of position and angle (SP) ..... Sept. 9 59
Static components excite generator (PD) ..... Mar. 162
Switching-logic functions. Sheets & Brown ..... Aug. 196
Tape controlled machining in small lots (N) ..... Jan. 209
Variably damped servomechanisms (A)
Mar. 372

Control Systems, Hydraulic

Higher pressures for mobile hydraulics. W. R. Master ..... Oct. 28 60
Hydraulic control valves. J. J. Pippenger. II Pressure control valves .. Jan. 196
III Flow control valves ..... Mar. 144
IV Directional valves ..... May 167
V Valve circuits ..... July 197
Hydraulic system redesigned to reduce weight (PD) ..... Apr. 152
Lift truck steers hydraulically (PD)
Sept. 16 89
Overcoming problems in hydraulic control (A) ..... Sept. 30 178

Corrosion

Cladding technique for corrosion protection (D) ..... Dec. 30 6
Fluidized plastic coatings for corrosion resistance. Neumann & Bockhoff
Jan. 140
Nickel alloys for controlled thermal expansion. E. M. Wise ..... Oct. 28 68
Pure water creates worst corrosion problem (N) ..... Nov. 18 15
Stress corrosion has new test (N)
Oct. 21 12
Two tests for stainless—atmospheric racks at Kure Beach, N. C., creep rupture at Monroeville, Pa. ... Oct. 14 5

Couplings

Flexible cushion coupling (C) ..... July 224
How to design involute splines. D. W. Dudley ..... Oct. 28 75
Lightweight coupling and flexible rod reduce rotor vibration (PD) ..... Jan. 157
Limited end-float couplings (A)
Dec. 23 130
Radially removable flexible coupling (C) ..... Mar. 220
Rubber couplings for locomotive drive (PD) ..... June 156
Sleeve and flanges make flexible coupling (SP) ..... Sept. 23 45
Torque for slip couplings (RS) .. Dec. 23 95

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorials. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

Cylinders

Cylinder size controlled automatically (PD) ..... Sept. 16 88
Double-acting, twin-piston cylinder (SP) ..... Sept. 9 58

—D—

Design

Analysis and design of air motors O. C. Teichman ..... Feb. 167
ASID head says product's function most important (N) ..... Oct. 28 88
ASME Fall Meeting papers (A) ..... Oct. 28 171
ASME paper highlights ..... Dec. 9 103
Bolted assemblies design. Silwones & Degen ..... Sept. 30 79
British try new approach to all-plastic car ..... Nov. 11 113
Cooking temperature control (PD) ..... May 180
Design by committee—crutch or opportunity? (Ed) ..... May 133
Design for limited warfare (N) . Dec. 30 19
Design for living in outer space—man and dog (N) ..... Dec. 2 24
Design for metal-powder parts. Talmage and Kolb ..... Aug. 183
Design for reliability (A) ..... Nov. 25 176
Do designers bar new ideas? (ED) ..... Oct. 7 21
High-energy fuels pose design problems ..... Sept. 9 25
High-speed electrostatic clutch. C. J. Fitch ..... Feb. 189
How has standardization affected the design of your products?—Points of View ..... Oct. 21 36
How to design ball bearing for water lubrication. R. P. Eklund ..... Oct. 28 72
How to design with shims. Thomas Barish ..... Aug. 164
How to find the final dimensions of stretch-formed parts. Bruce Russell (RS) ..... Nov. 25 121
How to keep score on an engineering project. J. G. Adiletta ..... Nov. 4 34
How to make invar stay put. W. S. Eberly ..... Dec. 9 80
Inventions that baffle Uncle Sam (N) ..... Nov. 11 117
Involute splines design. D. W. Dudley ..... Oct. 28 75
Japan's design law (N) ..... Dec. 30 25
The look of things (Ed) ..... July 133
Lubricating with air—report
Research focuses on gas bearings. Nicholas Chironis
How to design hydrodynamic gas bearings. Ausman & Wildmann ..... Nov. 25 99
Magnetostriction: a new design tool. E. M. Wise ..... Jan. 162
Miniaturization Award committee appointed (N) ..... Oct. 21 24
National Motor Bearing solves design problems by computer ..... Nov. 4 36
Plastic extrusions. Robert Marx ..... Nov. 25 84
Plastic parts—how to design out costs. R. L. Daggett ..... Oct. 14 77
Pressure-flange design extended (RS) ..... Dec. 9 117
Pretty—but does it work? R. M. Koff ..... Dec. 30 33
Redesign cuts weight, inventories. Grover & Packer ..... Oct. 14 99
Redesigning castings to weldments. O. W. Blodgett ..... Mar. 135
Reducing trial and error in compression spring design. J. J. Intintolo ..... Jan. 206
Shortcut for holding-magnet design. R. A. Scholten ..... Sept. 30 94
Soviet engineer discusses auto design ..... Nov. 11 111
Spherical swivel seat press formed in five operations. E. J. Urbas ..... May 204
Splines—when splines need stress control. D. W. Dudley ..... Dec. 23 56
Titanium carbide. J. C. Redmond ..... Nov. 11 84
Toward a new design philosophy—report
Design for automatic manufacture. L. DeKanski & others ..... May 136
Automation . . . who does it. W. H. Hannahs ..... May 140
How automatic assembly affects product design ..... May 142
Committee engineers profit into price. E. J. Tangerman ..... May 144
Multiple committees consider customer acceptance. Gordon Anderson Jr. ..... May 149
Pre-production engineering . . . by committee. P. S. Sussman ..... May 150
"Blast, then refine . . ." ..... May 154
Value control . . . extension of value analysis. L. D. Miles ..... May 155
Whither auto design. Felix Giordano ..... Nov. 11 106
World's Fair flashback (N) .... Dec. 16 17
You can fool SOME of the people (Ed) ..... Dec. 2 19
Young America designs. Dave Chapman ..... Oct. 21 32

Design see also **Industrial Design**

Design Engineering Show

Conference on product development in May ..... Mar. 188
Here's what happened ..... June 191
New components and materials at the Design Show ..... May 224
Program of 1957 Design Conference ..... May 188
Second Design Show doubles in size ..... Apr. 185

Differential

Differential springs can simulate load. G. H. Logan ..... Sept. 30 110

Drafting

ABC conference on drafting practice (A) ..... Dec. 23 130
Choosing equipment for drawing reproduction. A. W. Taber ..... Jan. 135
Drafting costs are going up. W. H. Byrne ..... June 166
Drafting machine (T) ..... Dec. 16 37
Functional drafting . . . another viewpoint. R. E. Meyers ..... Feb. 199
Have simplified drafting procedures saved you money?—Points of View ..... Nov. 18 42

Drawing

ACF introduces more efficient cold-draw process (N) ..... Sept. 23 25
Aluminum cans deep-drawn in one stroke (N) ..... Nov. 4 28

—E—

Economics

McGraw-Hill forecasts 'good' 1958, more research and development, keener competition (N) ..... Oct. 28 86
McGraw-Hill survey shows less spending on plants and equipment (N) ..... Nov. 18 25
What's ahead in business for 1957? (P) ..... Jan. 129
What's ahead for business in 1958 (P) ..... Nov. 25 67

Editorials

After 27 years ..... Jan. 133
Age of faith ..... Dec. 23 55
Are we Frankensteins? ..... Mar. 133
Are we short of engineers? .... Sept. 23 23
Career insurance ..... Oct. 28 51
Design by committee—crutch or opportunity? ..... May 133
Do designers bar new ideas? .... Oct. 7 21
Don't tense! ..... Nov. 25 71
How apt is a machine? ..... Apr. 133
Integration for engineers? .... Sept. 30 69
It's what we do next that counts ..... Oct. 21 17
The look of things ..... July 133
The next 5 years ..... Sept. 16 67
1 man with an idea . . . and time to think ..... Nov. 4 17
Raiding isn't recruiting ..... Feb. 133
Rubber-band mind ..... June 133
Steps taken, steps to take .... Nov. 18 21
Troublemaker? ..... Nov. 11 83
Wanted: men who talk back ..... Aug. 133
Watch the bellwethers ..... Oct. 14 67
"We don't always know what we're doing . . ." ..... Sept. 9 23
Why aren't engineers recognized? ..... Dec. 9 71
Why we need to know ..... Dec. 16 24
With a sense of urgency ..... Dec. 30 17
You can fool SOME of the people ..... Dec. 2 19

Education

Career insurance (Ed) ..... Oct. 28 51
Development of engineering managers through planned education and training (A) ..... June 411
Engineering students (P) ..... May 123
How to improve systems engineering (A) ..... Sept. 30 183
Motivation of engineering students in the study of English (A) ..... May 426
On future engineering and scientific education (P) ..... Dec. 9 67
Plan for aid-to-science-education (N) ..... Dec. 30 22
Professors vs. engineering education (A) ..... May 430
Southwest boosts science (N) ... Dec. 9 110
Unique grad school is thriving (N) ..... Oct. 14 111
Wayne Univ. offers orbit course (N) ..... Nov. 4 26
Western Electric engineers back on 'campus' ..... Aug. 204
What are the educational shortcomings of your recently hired engineering graduates?—Points of View .. Nov. 4 38

Electrical

Activated atoms and semiconductors in new photoelectric system (D) . Oct. 28 9
Crystalline boron (N) ..... Oct. 21 13
Diamonds as semi-conductors? (D) ..... Nov. 4 11
Direct conversion of heat into electricity (D) ..... Dec. 16 5
Electricity from gases (D) .... Sept. 23 8
Miniature windmills as electric power source (D) ..... Nov. 4 5

Electronics

All-electronic landing system for planes (N) ..... Oct. 28 90
All-electronic telephone exchange (D) ..... Nov. 4 11
Automation in electronics is bunk (P) ..... June 127
Balancing machine (D) ..... Oct. 7 13
Battery-operated electrolytic conductivity recorder (D) ..... Sept. 23 5
Devices for your tickler file (N) ..... Sept. 9 16
Electron tubes for industrial applications. Dr. W. LaPierre ..... Mar. 189
Electronic tracing systems control milling machines (PD) ..... July 150
Electronics checks aircraft vendor specs (N) ..... Dec. 16 22
Electronics for eye operations (N) ..... Dec. 2 22
Electronic megaphone (D) ..... Dec. 2 15
Electronic message-switching speeds Air Force communications (N) ..... Dec. 30 23
The growth of industrial electronics (N) ..... July 204
Heat, load, speed, flow controlled by electronic device (SP) ..... Sept. 23 45
Market for electronic telemetering (D) ..... Oct. 7 5
Modular electronic units. John Alden ..... July 164
Navy's shift to electronic data processing (D) ..... Sept. 23 11
Needed: more reliable electronic components (N) ..... Oct. 7 26
Reading machine (D) ..... Sept. 9 15
Resistance of parallel circuits. Leo Fidergant ..... May 221
Sight-and-sound recorder (N) . Oct. 14 114
Simulator for jet airliners (N) . Nov. 11 117

Electroplating

Electroplating from organic solutions (D) ..... May 9
Peening cuts stresses in plated parts. W. W. Safee ..... Dec. 9 92
Plated finishes—the choice widens. Gore & MacIntosh ..... Oct. 28 81

Engineering Administration

The administrative engineer . . . CAN help. P. W. Kelly ..... Apr. 190
Are engineers human? ..... Nov. 11 79
Are we short of engineers? .... Sept. 23 23
Are you paid what you're worth. Dr. E. B. Peck ..... Mar. 140
Are you paid what you're worth?—Readers reply to the question . . May 205
Creativity and engineering education (A) ..... May 410
Defense cuts—but engineer shortage remains (N) ..... Oct. 21 22
Development of engineering managers through planned education and training (A) ..... June 411
Drafting costs are going up. W. H. Byrne ..... June 166
Engineering is what we make it (A) ..... Nov. 25 17
Engineering jobs: easy to get? (P) ..... Mar. 127
Engineering 'South of the Border' (N) ..... Oct. 14 113
Engineering students (P) ..... May 123
Engineering teachers "moonlighting"? (N) ..... Nov. 4 28

(A) Abstract, (C) New Components. (D) Developments. (Ed) Editorials. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

The engineer's bookshelf. R. M. Koff ..... Mar. 167
Engineers can be found—and kept. G. F. Nordenholt ..... Nov. 25 75
Engineers here and abroad (P) ..... Sept. 26 61
Engineers study administration (A) ..... Mar. 382
Evaluating engineers and scientists (A) ..... Oct. 28 168
Expand tests to pick machine designers (N) ..... Dec. 23 88
Filing for faster reference. Longin Galockin ..... Dec. 9 82
Graduate study in mechanical engineering (A) ..... May 402
How product-planners work in Canada ..... Sept. 9 46
How to communicate
How to make instructions clear. J. Owen Dibbs ..... Dec. 23 64
How to report to your manager. R. F. Philip ..... Dec. 23 65
How to keep score on an engineering project. J. G. Adiletta ..... Nov. 4 34
How to keep tabs on your technical information (D) ..... Dec. 16 11
How to make up your mind—"Total Think" ..... Sept. 23 35
How to produce more ideas (A) .. June 408
Human factors in the management of engineers (A) ..... May 438
Industrial designer—is he friend or foe? James Teague ..... Oct. 7 23
Industrial designers in demand (N) ..... Oct. 7 24
Integration for engineers? (Ed) ..... Sept. 30 69
It's how you say it. Sidney Reitman ..... Nov. 18 39
Machine designer. Amber & Amber ..... Nov. 4 33
Keeping engineers happy. A. H. Kurilloff ..... Sept. 9 49
Management of large R & D organizations (A) ..... June 408
MIT boosts faculty salaries (N) .. Dec. 2 28
Mathematical library. C. R. Sexton ..... Apr. 192
Minneapolis-Honeywell engineers join the UAW union (D) ..... May 9
Need definitive shakedown, warns ASME head (N) ..... Oct. 7 27
New building for engineering societies by 1960 (N) ..... Dec. 2 23
Operations research takes a look at itself. D. B. Hertz ..... Dec. 2 36
Organization and the human being. Chris Argyris ..... Dec. 30 26
Pretty—but does it work? R. M. Koff ..... Dec. 30 33
Psychological tests in an engineering department (A) ..... Feb. 296
Public must understand science before U. S. wins 'war of labs' (N) .. Nov. 18 25
Raiding isn't recruiting (Ed) ..... Feb. 133
Rubber-band mind (Ed) ..... June 133
Shortage—latest in boomerangs (N) ..... Sept. 9 33
So you're going to read a paper! (A) ..... Apr. 395
Survey points up poor utilization of engineers (N) ..... Sept. 23 26
Systems engineering (A) ..... Oct. 28 168
Technology challenged to defeat mass poverty—or else (N) ..... Nov. 4 20
Testing and training engineers for creative ability (A) ..... Apr. 387
Troublemaker? (Ed) ..... Nov. 11 83
Unified code of ethics for hiring engineering grads (N) ..... Oct. 28 86
Unity among engineers (P) .... Sept. 30 63
What are the educational shortcomings of your recently hired engineering graduates?—Points of View ..... Nov. 4 38
What helps you get ahead? . . . Not what you think (N) ..... Sept. 9 34
What is the relationship between the Chief engineer and the head of the production department?—Points of View ..... Dec. 2 38
Why aren't engineers recognized? (Ed) ..... Dec. 9 71

Engines and Engine Control

Air-propelled Liberty ship (D) . Oct. 21 6
Carburetor operates in any position (PD) ..... Jan. 146
Ceramic coated piston promises to cut exhaust smog (N) ..... Nov. 18 29
"Clamshell" gives jets powerful braking action (N) ..... Dec. 30 23
Diesel exhaust drives locomotive turbine (PD) ..... Sept. 16 92
Engine needed; engineered power package bought (PD) ..... Dec. 23 70
Free piston turbine engine tractor (PD) ..... July 154
Fuel burning research needed if better engines are to be built (D) .. Sept. 6 9
High-energy fuels pose design problems ..... Sept. 9 25
Less noise from small engines. Kamo & Iwatsuki ..... Nov. 25 95
Low tension ignition system (C) .. Feb. 220
Model engines (D) ..... Sept. 9 15
Multi-cylinder supercharger (PD) . July 158
New form of propulsion coming up? (N) ..... Sept. 23 17
Old hull, new engine—ship hits 17 knot (N) ..... Oct. 14 110
Predict 50%-80% efficiency for new turbine-type engine (N) ..... Aug. 202
Russian engineers boast 25% fuel saving for new ZIL-120FB engine (D) ..... Dec. 9 9
Smaller engines—bigger production problems (N) ..... Oct. 14 112
Vacuum actuated pin meters fuel (PD) ..... June 163
Work capacities of energy storage systems on basis of unit weight and unit volume (A) ..... Aug. 325

Extruding

Aluminum impact extrusions. Nicholas Marchak ..... Nov. 25 72
Factors in cold extrusion of metals (A) ..... Sept. 16 192
Molybdenum seamless tubing by cold extrusion (N) ..... Sept. 9 29
Plastic extrusions. Robert Marx . Nov. 25 84
Seamless heavywall tubing—46 feet in 7 seconds (N) ..... Dec. 2 26
When to use cold extrusion for steel parts. C. B. Grace ..... Aug. 145

—F—

Fastening

Chromium-steel bolts with 170,000 psi tensile at 900 F (C) ..... June 220
Fastening studs and pins to plates. D. Mascio (MS) ..... Mar. 194
Fatigue strength of bolts reduced by longitudinal flaws. Joseph Viglione ..... Mar. 203
14 ways to fasten hubs to shafts. M. Levine (MS) ..... Aug. 194
Grooves for retaining ring assemblies. Hugo Wurzel ..... Jan. 158
Miniature self-locking screws. J. E. Johnson ..... June 151
Stripping strength of tapped holes. Francis Kull (RS) ..... Feb. 215
Taper pins—17 ways to retain them positively. Federico Strasser (MS) ..... Nov. 11 122
20 tamper-proof fasteners. Frederico Strasser (MS) ..... July 176
Which rivet to use. Henry Peterson (RS) I ..... Oct. 28 97
II ..... Nov. 11 126

Finishes, Chemical

Better finishes? Basic data needed (N) ..... Oct. 21 12
Ceramic coated piston promises to cut exhaust smog (N) ..... Nov. 18 29
Coatings that are tougher, more flexible (D) ..... Nov. 25 8
Conductive and resistive coatings (A) ..... Oct. 28 173
Graphite for machine parts? (D) ..... Nov. 25 9
Gaskets that are sprayed. R. E. Wagner ..... Oct. 14 90
Hot-dipped aluminum coatings. H. L. Kee ..... Oct. 28 87
Luminous paint (D) ..... Dec. 16 5
Measuring the adhesion of organic coatings to metal surfaces (D) ..... July 9
New coatings for steel and aluminum (D) ..... Nov. 4 11
Shellac has some new applications (D) ..... Oct. 7 5
Superalloy temperature range extended with flame-sprayed coatings (N) ..... Sept. 16 118
Vacuum coatings go industrial. P. J. Clough ..... Dec. 23 67

Finishes, Mechanical

Basalt as linings for ball mills, cyclones (D) ..... Oct. 7 13
More on surface finish inside tubes ..... Apr. 166
Optical finishing methods are applied to metals (D) ..... May 9
Pre-painted steel—report. F. R. Park ..... Dec. 9 99
Surface finish—tolerance and cost. K. S. Collart ..... Sept. 16 82
Surface finish—what it is, how it is measured. R. E. Reason .... Sept. 16 77
Tin finish (D) ..... Dec. 16 12

Finishes, Plastic

Fluidized plastic coatings for corrosion resistance. Neumann & Bockhoff ..... Jan. 140
Transparent conductive coatings (D) ..... Sept. 23 8

Finishing

Electroplated alloys. Gore & MacIntosh ..... Oct. 28 81
Enameling aluminum (D) ..... Sept. 9 6
Hot finish-forming titanium. Bayer & Wood ..... July 146

Fittings

Compression fitting secures tubing or wiring (SP) ..... Dec. 30 38
Plastic fittings with built-in heating coils (D) ..... June 9

Flexible Shafts

Flexible shaft (SP) ..... Sept. 9 59

Fluid Mechanics

Flow rate of liquids through orifices. H. C. Lowe ..... May 223
Friction in pipes—a wide range nomograph. Reagan Houston ..... Aug. 191
Lubricating with air—How to design hydrodynamic gas bearings. Ausman & Wildmann ..... Nov. 25 99

Fluids

Magnetic fluid dynamics to replace heat engines? (N) ..... Sept. 23 17
New ways to indicate and control liquid level (D) ..... Oct. 7 6
700 F hydraulic fluid, but no seals, bearings (N) ..... Nov. 11 118

Forging

Aluminum hand forgings with low internal stresses (D) ..... Jan. 9
New aluminum forging alloy. Warren Bomhardt ..... Dec. 23 62
Vacuum melted alloys for forged parts. Dyrkacz & Reynolds ..... Feb. 143

Forming

Compression forming tightens sheet-metal tolerances (D) ..... Dec. 2 7
Formability of flat spring material. J. B. Beckwith (RS) ..... Sept. 16 125
Hot finish-forming titanium. Bayer & Wood ..... July 146
Machine forms wire baskets (PD) . Aug. 158
Mill forms from metal powder (C) ..... Feb. 220
Nickel electroforming (A) ..... Feb. 325
Press has laminated frame (PD) .. May 176
Spherical swivel seat press formed in five operations. E. J. Urbas .... May 204

Fuel

Fuel that won't burn? (D) .... Oct. 21 5
If better engines are to be built fuel burning research is needed (D) ..... Sept. 16 9
Stored energy in efficient form (D) ..... Dec. 16 6

Fuses

Current limiting fuses and air circuit breakers (A) ..... Feb. 332

—G—

Gaskets

Gasketed joints for electrical equipment. L. E. Feather ..... Mar. 183
Gaskets that are sprayed. R. E. Wagner ..... Oct. 14 90
High pressure gaskets (A) ..... Feb. 300

Gear Drives

Gear drives for extreme conditions (A) ..... July 358
Speed-torque analysis for complex mechanical systems. V. H. Seliger .. Feb. 179

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorials. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

Gears

AGMA meeting stresses more economical gear inspection (N).....Nov. 11 118
Cams and gears. Beggs & Beggs .....Sept. 16 84
Design for fine-pitch wormgearing (A) .....Jan. 361
Epicyclic gear train calculations. Conklin & Ballmer.....Apr. 186
Epicyclic gears for control mechanisms. J. W. Edgemond Jr.....Feb. 194
Gear-shift arrangements (MS) Sigmund Rappaport .....Apr. 188
Machine pins gears to shaft (PD).Mar. 163
Multiple-speed gear reducer (C) .Dec. 9 121
Power capacity of spur gears. Charles Tipitts (RS) .....Aug. 215
Profile diagrams specify gear errors. L. H. Harris.....Oct. 14 86
Rocking chute orients gears for test (PD) .....Feb. 158
7 rules simplify instrument gear specifications. W. A. Wiegand.....Nov. 25 80
Shot peened gears increase torque rating of transmission (PD).....Jan. 149
Speed reducer gears can be interchanged (SP) .....Dec. 2 41
Stress cycles, in planetary gears. L. E. Iversen (RS) .....Jan. 219
Tolerances for over-pin gear measurements. G. W. Michalec.....May 194
Undercutting of spur gear teeth (A) .....July 362

Generators

Ceramic mat turns fuel gas into infrared heating (N).....Oct. 21 23
Free-piston generators are making big strides (D) .....Oct. 7 13
Packaged D-c power sources for machine tools .....June 144
Static components excite generator (PD) .....Mar. 162
Thermoelectric heater mounted in telephone pole (D).....Nov. 25 9

Glass

Glass flake laminate (A).....May 438
Glass flakes control light, stop corrosion (D) .....Nov. 4 5
Powdered glass gives mold for stronger castings. Youngs & Heymann.Oct. 14 68

Government

AEC to request eased restrictions for nuclear materials (D).....Nov. 4 9
Air Force stretch-outs ending (N) .....Sept. 23 28
Committee investigations, hearings and blasts (D) .....Dec. 30 9
Companies complain already about risks of government contracts (D) .....Oct. 7 11
Defense spending up $1 to $2 billion next year (D).....Dec. 2 13
Dept. of Labor insists there is an engineering shortage (N).....Oct. 21 23
Design for limited warfare (N).Dec. 30 19
Designs accepted or rejected faster with new Army setup (D).....Sept. 9 11
Joint government-industry gage block project (D) .....Oct. 21 5
Labeling laws (D).....Dec. 30 6
Less control on defense spending (D) .....Dec. 16 11
Liberty ships for sale—scrap-metal prices drop (D).....Dec. 2 13
Military research spending to be upped (D) .....Dec. 2 13
Missile budgets are no longer automatically safe (D).....Sept. 23 11
More money for government scientists and technical employees (D)...Dec. 30 9
Navy announces stretchout; warns more to come (N).....Sept. 16 115
New look in defense contracts shapes up (N) .....Sept. 30 114
NSIA will stress risks in accepting government contracts (D)...Sept. 23 11
Pentagon purse strings are being pulled tighter (D) .....Oct. 21 9
Research and development programs will be hit by the spending squeeze (D) .....Oct. 7 11
Small business hears research is road to riches (N).....Oct. 7 25
Speed-up orders to missile contractors are scheduled (D).....Nov. 4 9
Tax refund for moving (N).....Dec. 23 90
$38-billion defense spending ceiling will be exceeded (D).....Nov. 18 11
Translation of Russian technical journals (D) .....Dec. 16 11
Transportation costs will go up (D) .....Dec. 16 11
U. S. can't tax this job refund (N) .....Nov. 4 26
U. S. invests heavily in fresh water—salt water to fresh (N).....Oct. 7 23
U. S. missile programs still need cash (D) .....Dec. 30 9
Universities hit by government research cuts (P) .....Oct. 28 47

Graphical Techniques

Friction in pipes—a wide-range nomograph. Reagan Houston.....Aug. 191
How to predict performance of rubber vibration isolators. W. W. Soroka .....July 141
New nylon from France. J. Fouque .....Dec. 23 76
Profile diagrams specify gear errors. L. S. Harris.....Oct. 14 86
Reducing trial and error in compression spring design. J. J. Intintolo .....Jan. 206
Standardized method for construction nomographs. C. P. Nachod.....Mar. 215
Surface finish—tolerance and cost. K. S. Collart .....Sept. 16 82
Surface finish—what it is, how it is measured. R. E. Reason.....Sept. 16 77
Torsional strength of shafts (RS) .....Sept. 30 123
Vectors simplify tolerance analysis. W. Hanka .....July 195
Watch out for compression loads. L. A. Yerkovich .....Dec. 9 72

Grinding

Automatic transfer-finger (D)...Nov. 4 11
Escapement feeds parts (PD).....May 181
High-speed ball mill (PD).....Sept. 30 87

—H—

Human Engineering

Add "Human Barrier" (D).....Sept. 9 11
Design for living in outer space—man and dog (N).....Dec. 2 24
Flickering lights (N).....Sept. 23 17
Human engineering guides lawn mower design (PD) .....Apr. 160
Human factor in machine design (A) .....Mar. 386
Man is a machine component. D. N. Chorofas .....Dec. 30 34

—I—

Industrial Design

A series lightweight rifles (D)....Feb. 9
American Society of Industrial Designers annual meeting—designers applaud (and dispute) their conclave prophets (N) .....Nov. 4 28
Analog points to optimum design (PD) .....Dec. 9 88
Analytical balance (T).....Dec. 30 30
Armor-piercing projectile has glued-on windshield (N) .....Sept. 9 28
Bag-filling machine (D).....Oct. 28 9
Bend-holding clips (SP).....Dec. 30 38
Bolt with parallel driving slots (SP) .....Oct. 7 39
Cardiograph goes to patient (PD) .....Dec. 23 73
Christmas ideas (T).....Dec. 2 32
Cigarette vending machine sells at four prices (PD) .....Nov. 25 90
Converted army searchlight (N) .....Nov. 18 28
Custom-built machine tools cue new trends in industry (N).....Sept. 23 25
Dental instrument unit (N).....Sept. 9 42
Dentist's drill (PD).....Sept. 30 89
Diamonds—man-made diamonds ready for production (N).....Nov. 11 116
Earthmoving equipment—design for pay dirt .....Dec. 23 80
Electro-mechanical compensator (SP) .....Sept. 23 44
Engineers called on to control rising maintenance costs (N).....Oct. 21 24
Fine-pitch wormgearing design (A) .....Jan. 361
Flexible doors solve noise, dust, heat-control problems (N).....Dec. 16 19
Free-piston rock drill (PD).....May 179
Friction drive transports tape in dictating machine (PD)..... .....Jan. 148
Gas analyzer (PD).....Sept. 30 88
Hannover Fair designs spotlight mobility (D) .....Oct. 21 10
Hard surfacing supplied on flexible backing (SP) .....Dec. 2 41
High-speed ball mill (PD).....Sept. 30 87
Human engineering guides lawn mower design (PD) .....Apr. 160
Laminated plastics design hints. G. A. Ebelijare (MS) .....Jan. 186
Lamp unit developed by Navy (N) .....Dec. 30 24
M60 general-purpose machine gun (T) .....Sept. 23 38
Machine tools (T).....Nov. 18 32
Machine tools—further design changes (D) .....Dec. 23 9
Machines for the fusion age (N).Nov. 4 12
Numerically controlled jig borer (PD) .....Feb. 148
Nut, self-locking, leak-resistant (SP) .....Dec. 2 41
Orbital motion mechanism drives saw blade (PD) .....Jan. 154
Oscillograph is designed to order (PD) .....Feb. 150
Paper dresses (D) .....Sept. 9 8
Panelescent lamp uses phosphor-ceramic on steel (N).....Feb. 201
Photosensitive plates for printing (D) .....Nov. 18 8
Plastic case styles battery tester (PD) .....June 165
Porous solid releases liquids or gases (SP) .....Nov. 4 42
Printer duplicates microfilm files (PD) .....Nov. 11 94
Printer-slotter (PD) .....Oct. 28 66
Quick-response heat detector (D) .....Nov. 18 13
Record-size tapering tank goes to work (N) .....Oct. 7 26
Rifle, M15 (T).....Sept. 23 38
Rotating cutters peel threads at high speed (PD) .....Mar. 150
Sampling devices (D).....Nov. 18 7
Saws (T) .....Oct. 21 38
Scale for supermarket operators (N) .....Sept. 9 43
Solderless plugs and receptacles (SP) .....Oct. 7 38
Sphere with conical corners (SP) .....Dec. 16 44
Sprayer uses hydrocarbon vapor in place of air (D).....Dec. 16 12
Suction pickoff feeds blanks to envelope machine (PD) .....Feb. 154
Sweden designs low, lightweight train (N) .....Jan. 210
Two-speed press drive (PD).....Apr. 163
Typewriter, electrified portable (PD) .....Mar. 154
Typing keys select tabulating columns (PD) .....July 160
U. S. Army—new weapons (T).Sept. 23 38
Watch runs without winding (PD).Apr. 156
Watch shows time to tenths of seconds (PD) .....Nov. 25 93
Water heater sealed with welded torus (PD) .....Oct. 14 85
Weight-controlled vibratory feeder (PD) .....Apr. 162
Welded aluminum freightcar carries heavier payload (PD).....Feb. 155
Wind tunnel becomes a shelf item (N) .....Nov. 4 25
Wood crasher (D).....Dec. 2 15
X-rays come alive (PD).....Dec. 9 87

Instrumentation

Accurate electrical current measurement (D) .....Apr. 9
Aircraft stall warning (PD).....Aug. 160
Balance mechanism like that in the human inner ear will be used to detect the slightest variation in the position or speed of a missile or manned aircraft (D).....Jan. 9
Can a machine translate Russian? (N) .....Dec. 23 85
Color specification may be easier (D) .....Sept. 9 5
Combined instrument joins three-phase power sources (T).....Dec. 30 30
Diaphragm characteristics (A)...Mar. 402
Digital torque measuring system (C) .....Oct. 14 127
Direct-reading caliper (T) ....Dec. 30 30
Direction and velocity sensing probe (C) .....Sept. 30 127
How apt is a machine? (Ed).....Apr. 133
Indicators show tie rod strains (PD) .....July 162
Microdeviometer measures variations in pitch uniformity (D).....Dec. 23 9
More on surface finish inside tubes.Apr. 166
New space, atom research center (N) .....Dec. 30 25
Optical micrometer in jig borer (PD) .....June 160
Oscillograph is designed to order (PD) .....Feb. 150
Oscillogram scanner (SP).....Oct. 21 43
Photoelectric scanner (SP)....Dec. 16 44
Readouts (SP) .....Dec. 2 40
Remote counter (C).....Oct. 14 127
Russians work on automated steel plants (N) .....Dec. 30 24
Strain gages guide sawmill design (D) .....Dec. 30 6
Tape-on surface temperature resistors (D) .....Feb. 9
Transistor-equipped counters need only 1-volt (SP) .....Nov. 18 47
12 ways of measuring speed. Carlsten & Hellebust (MS).....Feb. 192
Variable-frequency stroboscopic light source (SP) .....Dec. 2 40

Insulation, Electrical

Cellular plastic insulation (D)...Dec. 2 8
Electrical insulator manufacturers defer grouping (N).....Dec. 30 22

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorials. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

Plastic film for electrical insulation (D) Oct. 7 6
Synthetic mica passes road test (N) Sept. 23 19

Insulation, Thermal
"Fusible" silicone insulating tape (SP) Oct. 7 38
New materials from farm crops (N) Sept. 23 17
Nylon batting used for vibration, thermal insulation (C).....May 232
Thermal insulation. C. M. Bosworth Nov. 11 97

—J—

Joining
Gasketed joints for electrical equipment. L. E. Feather.....Mar. 183

—L—

Linkages
Linkages gain on cams.....Dec. 23 75
16 latch, toggle and trigger devices. Sigmund Rappaport (MS).....May 200
Standardized notation and classification for four-bar linkages (A)....Oct. 28 171

Lubrication
ASLE-ASME Lubrication Conference papers (A) .....Nov. 11 198
Antiwear and extreme pressure additives for greases (A).....May 418
Developments in aircraft turbine lubricants (A) .....Sept. 30 178
Disturbances due to bearing oil films (A) .....May 415
Electrical effects in stick-slip phenomenon (A) .....Apr. 387
How to lubricate ways. W. O. Wright (MS) .....Dec. 9 114, Dec. 23 92
London Conference on Lubrication. Ernest Rabinowicz & H. A. Hartung Nov. 25 82
Lubricating with air—report
Research focuses on gas bearings. Nicholas Chironis
How to design hydrodynamic gas bearings. Ausman & Wildmann Nov. 25 99
Lubrication committee updates reports Dec. 9 104
Oil and greases for the 700 F to 800 F range (D) .....Dec. 9 9
Oil seals to provide positive lubrication on large or high-speed thrust bearings (A) .....Aug. 320
Solid film lubricants—factors influencing friction and wear (A).....Feb. 302
Surface roughness (A).....Feb. 316
Temperature effects in journal bearing lubrication (A) .....Feb. 316
Unit guards against lubrication failure (C) .....Feb. 220
Water bearings and air bearings (A) May 398

Machining
Electro-mechanical compensator (SP) Sept. 23 44
Electronic tracing systems control milling machines (PD).....July 150
Europe approaches U. S. in machine-tool efficiency (N).....Oct. 21 22
Gantry machine (PD).....Dec. 23 72
Gripper fingers control paper in letter press (PD) .....Dec. 23 74
Indicators show tie rod strains (PD) July 162
Italy to host first machine-tool fair (N) .....Dec. 30 24
Lathes—sandwich manifolds replace piping (PD) .....Oct. 14 84
Machines tools (T).....Nov. 18 32
Machine tools spearhead general machine design (N).....Sept. 23 25
Machining tolerances (RS).....May 219
Microhoning machine controls cylinder size automatically (PD).....Sept. 16 88
1958 US World Trade Fair plotted (N) Dec. 16 23
Press built for fast die change (PD) Oct. 14 83
Rockets as machine components? (D) Oct. 14 9
Rotating cutters peel threads at high speed (PD) .....Mar. 150
Rotating tool reset automatically (PD) Aug. 157
Self-compensating thread rolls (PD) Aug. 156
Tape controlled machining in small lots (N) .....Jan. 209
Truer holes with new drill point (D) Nov. 4 6
Twenty-high mill rolls ultra-thin strip (PD) .....Sept. 16 91
When to take time for machinery replacement (A) .....Oct. 28 168

Magnesium
Magnesium castings can be welded without distortion. Mansfield & Gesualdo .....Sept. 16 94
Magnesium parts now stronger, better protected (N) .....Dec. 30 13
Quality and cost of magnesium sand castings. F. M. Giordano.....Mar. 164

Magnets
Ceramic magnets make compact chuck (PD) .....Nov. 11 96
Cunife magnets (D).....Dec. 2 8
Shortcut for holding-magnet design. R. A. Scholten.....Sept. 30 94
What you should know about new magnets. C. J. Lynch.....Dec. 2 34

Materials Handling
Cooking by slide rule (D).....Sept. 23 6
Elevator truck van reduces load-unload time (N) .....Aug. 201
Escapement feeds parts (PD).....May 181
Ladle cranes for steel mill (PD).Oct. 28 67
Mechanical fingers flip out parts (PD) Nov. 11 96
RR's get answer to boxcar-weight puzzle (N) .....Sept. 30 113
Self-centering conveyor roller (PD) June 155
Self-propelled batch-weigher (D) Oct. 21 10
Stud welding floor plates lowers cost of coke cars (PD).....Mar. 157
Steel band conveyor on V-belts (A) May 430
Tractor shovel lifts higher, is safer for operator (PD) .....Jan. 150
Transfer mechanism automates pipe tapping machine (PD).....Feb. 157
Vacuum pickup positions pills (PD) Aug. 154
Weight-controlled vibratory feeder (PD) .....Apr. 162
Woven-wire conveyor belts. J. F. Reid Apr. 181

Mathematics
Computers simplify solutions of polynomial cam curves. Kloomok & Muffley .....Mar. 196
Curve fitting (A).....Dec. 23 130
Elliptic-type closed curves. Worley & Breuer .....Aug. 141
Learning curves—key to better labor estimates. M. S. Titleman...Nov. 18 36
Mathematical tables . . . a bibliography. C. R. Sexton.....July 183
More books—a mathematical library. C. R. Sexton.....Apr. 192
New data—interval number system. F. W. Hottenroth.....Apr. 178
Probability applied to assembly fits. G. D. Pheil.....Nov. 25 88
Problem solving by linear programming. G. P. Hadley.....Oct. 14 92
Shortcut for holding-magnet design. R. A. Scholten.....Sept. 30 94
Short-cut for powers of numbers. W. J. Worley .....May 202
Shortcut to critical frequencies of torsional systems. M. F. Spotts..Sep. 16 110

Metals, Ferrous
Are we running out of metals? E. A. Brandes .....Sept. 23 36
Burning rate of metals (D).....Nov. 18 11
Chemical milling gaining momentum (N) .....Nov. 25 110
Chromium-steel bolts with 170,000 psi tensile at 900 F (C).....June 220
Ductile iron wheel halves cost. H. A. Feller & others.....Aug. 162
Four major metals in the future automotive industry (D).....July 9
How cost patterns are changing (N) Oct 7 17, Dec. 30 13
How metals change by irradiation. H. J. Raiklen .....Apr. 168
How to make invar stay put. W. S. Eberly .....Dec. 9 80
Lead and zinc price increase (D) Oct. 21 9
Mechanical properties of iron-aluminum alloys (A).....Feb. 310
Metal hose. W. T. Bahr.....Nov. 11 87
New uses of electronics (A).....Jan. 208
Nickel-ferrite replaces nickel in new magnetostrictive material for ultrasonic transducers (D).....June 9
Price drops for more metals (D) Nov. 4 9
Scrap metal prices may be dropping (D) .....Dec. 2 13
USSR outspeeds US in metals (N) Dec. 2 47
Watch out for compression loads. L. A. Yerkovich .....Dec. 9 72

Metals, Ferrous See Also **Steel**

Metals, Nonferrous
Are we running out of metals? E. A. Brandes .....Sept. 23 36
Burning rate of metals (D).....Nov. 18 11
Cast corrosion resistant alloy with better mechanical properties (D)...Jan. 9
Cesium and rubidium—elements for ion propulsion (N) .....Oct. 7 17
Chemical milling gaining momentum (N) .....Nov. 25 110
Columbium looking for jobs (N)..Nov. 4 14
Columbium no longer a scarce material (N) .....Dec. 2 17
Copper—switching positions with aluminum? (D) .....Sept. 23 19
Fiber metallurgy (A).....Aug. 320
Foamed metals (N).....Nov. 18 17
Four major metals in the future automotive industry (D).....July 9
High temperature nickel-base alloys (A) .....Aug. 320
How cost patterns are changing (N) Oct. 7 17, Dec. 30 13
How design affects cost of chrome-plated diecastings. D. H. Robinson May 190
Lithium key to new alloy-X2020 (D) Nov. 11 9
Metal hose. W. T. Bahr.....Nov. 11 87
Molybdenum ingots of high-purity (N) Sept. 23 19
Molybdenum seamless tubing by cold extrusion (N) .....Sept. 9 29
More calcium metal (D).....Sept. 30 9
Neptunium—technical data (D).Sept. 9 11
New compounds are stable only at high temperatures (N) .....Oct. 7 15
New materials: interest up; consumption down (N).....Sept. 23 19
New oil-less bearing material. Shaw & Knopp .....Jan. 203
New route to nickel-aluminum alloy parts (D) .....Oct. 28 9
New sources opened in Canada (N) Oct. 7 17
Nickel alloys for controlled thermal expansion. E. M. Wise.....Oct. 28 68
Nickel electroforming (A).....Feb. 325
Nobelium makes its debut (N)..Sept. 9 16
Rhenium—next year's "wonder metal" (D) .....Dec. 16 6
Scrap metal prices may be dropping (D) .....Dec. 2 13
Small traces of boron make austenitic chromium-nickel and chromium-manganese alloys more ductile at high temperatures (D).....Aug. 9
Spun tungsten and molybdenum parts (D) .....Nov. 11 9
Tin applications—some new ideas (N) Oct. 21 13
Tungsten price increase (D)...Sept. 23 11
Tungsten-silver compacts (D)....May 9
USSR outspeeds US in metals (N) Dec. 2 17
Vacuum melted alloys for forged parts. Dyrkacz & Reynolds.....Feb. 143
Watch out for compression loads. L. A. Yerkovich .....Dec. 9 72
Zinc doldrums blamed on imports (N) Sept. 9 31
Zinc undercoat helps prevent rust (N) Sept. 9 19

Metals, Nonferrous See Also **Aluminum, Magnesium, Titanium**

Meters
Bellows-type meter measures pressure differentials (SP) .....Nov. 18 47
Mechanical BTU meter (SP)...Sept. 9 58
Micrometer counts light fringes (PD) Jan. 152

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

Potentiometer uses dynamically balanced arm and contact (SP)..Nov. 18 47
Vacuum actuated pin meters fuel (PD) June 163

Missiles

Aluminum and magnesium for missiles (D) ..... Dec. 2 13
Design for limited warfare (N)..Dec. 30 19
Design for man or robot? (N)..Oct. 28 85
Experts predict space travel in 20 years (N) ..... Dec. 9 109
High-energy fuels pose design problems Sept. 9 25
It's what we do next that counts (Ed) Oct. 21 17
Launching site will be built in Australia (N) ..... Dec. 30 25
Long-range radar unit—Sputnik tracker (N) ..... Dec. 16 14
Missile's metallurgical miseries (N) Nov. 25 108
Missiles—keeping track of our missiles (N) ..... Nov. 4 19
Missiles—Russians ahead in metallurgy? (N) ..... Nov. 11 115
Plastic parts in rockets (PD).....July 156
Radar device triples range of present systems (N) ..... Dec. 2 26
Rocket launcher (PD).....Sept. 30 84
Safety first—in space travel too (N) Dec. 23 89
Satellites—"now, when there is relatively little time left . . ." (N) Oct. 23 89
Shortcut to space studies (N)..Sept. 9 16
Sputnik proves Russians have best rocket engines, 1st rate guidance system (N) ..... Oct. 21 21
Sputnik and us—world roundup of scientific comment (N).....Nov. 4 23
Stapp, Col. J. P., sees 3 bars to space flight (N) ..... Dec. 2 25
Surveillance drone (N) .....Dec. 30 25
US still has its missile problems (D) Dec. 30 9
Why we need to know (Ed)...Dec. 16 24

Models

Low-cost, mechanical mock-up kit (SP) Nov. 4 42
Model engines (D) .....Sept. 9 15
Models show how—report.....Sept. 16 99

Molding

Anodized aluminum molds make castings as strong as forgings. C. A. Parlanti ..... June 170
Molding printed circuits. N. L. Greenman ..... Sept. 30 90
Powdered glass gives mold for stronger castings. Youngs & Heymann..Oct. 14 68

Motors

Analysis and design of air motors. O. E. Teichmann .....Feb. 167
Control motors by varying frequency (C) ..... Dec. 23 102
Controlling temperature rise in induction motor drives. C. C. Libby..Jan. 167
Controls for multispeed motors. T. F. Bellinger ..... Feb. 183
Friction drive transports tape in dictating machine (PD).....Jan. 148
Gear motor provides remote control (C) ..... July 224
How to select motor enclosures for contaminated atmospheres. C. C. Libby .....Oct. 14 106
Induction motor speed-torque-current curves (A) ..... Mar. 372
Instrument-actuated motor operates control elements (C).....Dec. 23 101
Low inertia induction motors (A).Mar. 376
Lower-speed motors for high-performance drives. C. C. Libby.Sept. 16 96
Magnetic motor starters are 42% smaller (C) ..... Aug. 220
Multispeed motors. R. Dineen....June 140
New NEMA standards for motor starters reduce cost and space. J. R. McDermott ..... June 189
Shaded-pole motors. Schuette & Johnson ..... July 169
Shaft-mounted device instantly reverses motor (C) ..... Nov. 11 129
Shock mounting for motors (SP).Oct. 7 38
Small, low-voltage D-c motors (C) June 221
Solution of induction motor thermal circuits (A) ..... Feb. 310
Startup is still a problem (D)..Sept. 9 6
12 ways to couple fractional horsepower motors. Walter Strand (MS) Sept. 30 120
Torque motors and brakes. S. Noodleman ..... Apr. 146

Motors, Hydraulic

Interchangeable hydraulic drives (PD) Aug. 150

—N—

Noise

Less noise from small engines. Kamo & Iwatsuki .....Nov. 25 95
Look for increased attention to noise (D) ..... Sept. 30 9
Noise researchers at work (N)..Dec. 2 16
Some problems and design factors concerning noise in motor-driven home appliances (A) .....Apr. 391

Nucleonics

A-plane down but not out (N)..Nov. 25 107
Aircraft company diversifies to nuclear field (P) .....Apr. 129
ASTM to set up specs of radiation on materials (N) .....Sept. 16 117
Atomic progress—highlights in review (N) .....Dec. 16 14
British prototype submarine propulsion reactor (N) .....Dec. 2 27
Control-rod drives of at least five types being evaluated for nuclear reactor use (D) .....Dec. 30 5
Disclosures on controlled thermonuclear reactions (D) .....Dec. 30 9
First privately-owned nuclear power plant starts up (N) .....Nov. 18 26
Free radicals and plasmas (N)..Oct. 7 15
H-bomb tamed in England? (N) Oct. 21 12
High-energy fuels pose design problems Sept. 9 25
How many atomic particles? (N) Dec. 2 16
Industrial uses of radioisotopes (D) Oct. 7 11
Information center on radiation effects (D) .....Dec. 2 10
Machines for the fusion age (N).Nov. 4 12
Neutrons to order; they'll uncoil the atom (N) .....Sept. 23 17
New angles on irradiation (D)..Oct. 7 5
New materials by irradiation—report
How metals change by irradiation H. I. Raiklen .....Apr. 168
How irradiation affects aluminum alloys. Dr. H. H. Hausner....Apr. 169
How plastics change by irradiation. Ference & Restaino .....Apr. 172
Grafted plastics by irradiation. Dr. A. J. Restaino.....Apr. 173
Outlook for the atomic equipment industry (N) .....Apr. 192
Radioactive fission products (D) Sept. 16 9
Radiation—a cure for static (N) Sept. 23 17
Reactor conditions simulated in new test facility (N) .....Mar. 206
Search for gas-cooled-reactor builders (D) .....Oct. 21 9
Sonic waves may upgrade uranium ore (N) .....Dec. 16 22
USSR'S new first may be atomic locomotive (N) .....Nov. 11 114

—P—

Patents

Are patents any good?—Points of View Dec. 16 40
Congress to study patent system..Feb. 202
Is justice delayed, justice denied? (N) .....June 199
This invention revolutionized an industry—automatic bowling pin setter. G. S. Hastings.....Feb. 140
Up design patent protection; "still not enough!" says designers (N).Dec. 23 88

Personnel

Call the government for help in filling job vacancies (D) .....Nov 18 11
The engineer's bookshelf. R. M. Koff Mar. 167
Expand tests to pick machine designers (N) .....Dec. 23 88
Filing for faster reference. Longin Galockin .....Dec. 9 82
Graduate study in mechanical engineering (A) .....May 402
How to keep tabs on your technical information (D) .....Dec. 16 11
Industrial designer—is he friend or foe? James Teague .....Oct. 7 28
Learning curves—key to better labor estimates. M. S. Titleman....Nov. 18 36
Mathematical library. C. R. Sexton Apr. 192
The next one hundred years (P) Dec. 23 51
On the statistics of individual variations of productivity in research laboratories (A) .....July 368
Organization and the human being. Chris Argyris .....Dec. 30 26
Reverse sabbatical granted GE scientist, Dr. David Turnbull (N) Sept. 23 28
Testing and training engineers for creative ability (A) .....Apr. 387
Wanted: men who talk back (Ed)..Aug. 133
You, too, can be hit by flu (D)..Oct. 21 9

Photography

Army wants spate of new photographic techniques (D) .....Oct. 21 6
camera maps temperatures (PD) Dec. 9 86
Choosing equipment for drawing reproduction. A. W. Taber .....Jan. 135
Flash x-rays pierce smoke and flame (N) .....Nov. 18 15
Infrared camera (SP) .....Nov. 4 42
Keeping track of our missiles (N) Nov. 4 19
Photos at millionth of a second (N) Oct. 7 15
Plastic-cased 35-mm camera (T) Dec. 16 36
Powerful stratoscope promises photos 3 times sharper than any taken before (N) .....Oct. 7 26
Printer speeds film editing (D)....July 161
Shutterless aerial camera scans horizon (N) .....Sept. 30 115
Solar power adjusts camera iris (PD) Sept. 30 86

Plastics

Are plastics ready for a museum? (N) Oct. 21 13
Britain tries new approach to all-plastic car .....Nov. 11 113
Cartridge casing opens new vistas for plastics industry (N) .....Dec. 9 108
Castor-oil-polyurethane foams (D) Dec. 23 9
Colored-integral decoration for multiple-curved plastic (N) .....Sept. 9 33
Cracking and crazing under study at NBS (N) .....Dec. 16 14
Cut glass-fiber product costs (N) Dec. 2 27
Delaware & Hudson RR glues rail lengths with resin plastic to eliminate noise (N) .....Sept. 30 115
Design data for reinforced plastics (A) May 410
Design hints for laminated plastics. G. A. Ebelijare (MS).....Jan. 186
Directionally reinforced plastics (A) Dec. 23 136
Disappearing films (D) .....Dec. 2 7
Electrical and mechanical properties of epoxies (A) .....Nov. 25 174
Epoxy casting resins simplify three-dimensional photoelasticity. M. M. Leven .....July 135
Epoxy castings. B. F. T. Langsdorf June 135
Epoxy resin—better shielding materials (D) .....Sept. 30 9
Fiber-base structural materials. John Macadam .....Feb. 164
Fluidized plastic coatings for corrosion resistance. Neumann & Bockhoff Jan. 140
Fluorcarbon-glass laminates (D) Oct. 21 5
Foamed plastics moving fast (N) Dec. 30 12
Glass fiber resin process (A).....Mar. 380
Glass flake laminate (A) .....May 438
Grafted plastics by irradiation. Dr. A. J. Restaino .....Apr. 173
How cost patterns are changing (N) Dec. 2 17
How plastics change by irradiation. Ference & Restaino .....Apr. 172
How to design cost out of plastic parts. R. L. Daggett .....Oct. 14 77
Isotactic polypropylene resins (SP) Dec. 30 39
Japan uses plastics in rocket engines and lenses (D) .....Sept. 9 12
Mammoth plastic ventilator (D) Sept. 23 15
Methylstyrenes: ready to roll (N) Sept. 23 19
Molded plastics and hardboard for automotive headlinings (D)..Nov. 4 6
New nylon from France. J. Fouque Dec. 23 76
Plastic as a construction material (D) Aug. 9
Plastic extrusions. Robert Marx Nov. 25 84
Plastic case styles battery tester (PD) June 165
Plastic film for electrical insulation (D) Oct. 7 6
Plastic-foam field (D) .....Sept. 23 5
Plastic models (A) .....Aug. 330
Plastic parts in rockets (PD)...July 156
Polypropylene plastic (SP).....Dec. 30 39
Precision-machined balls (D)...Sept. 9 8

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.
(SP) Significant Parts. (T) Trends in Appearance Design.

Reinforced plastic paneling in machine tools and tractors (D).....Oct. 14 9
Reinforced plastic shell forms car frame (PD) .....Feb. 152
Rigid foams (A) .....Dec. 9 181
Rigid polyethylene ready to roll (N) Nov. 18 17
Rupture and impact stresses in reinforced plastics (A) .....Nov. 25 174
Russian auto engineers use plastics (D) Dec. 16 12
Scandinavian process (D) ....Oct. 21 5
Silica-reinforced plastic sheeting (SP) Dec. 16 45
36-inch plastic lenses, costing a tenth (D) .....Sept. 23 8
World survey of plastics production and use (D) .....Nov. 11 9
Zippered plastic harness for electrical wiring (C) .....Mar. 220

Plating

Electrode-less gold plating can open new opportunities (D) .....Sept. 9 5
How design affects cost of chrome-plated diecastings. D. H. Robinson May 190

Pneumatics

Air line pressure regulator (C)....Apr. 216
Air pressure measures machine level, isolates vibration (C).....Oct. 28 101
Automatic pneumatic tacker (PD).Aug. 148
Compressed air for push or pull. Stewart & Moritz .....Oct. 14 72
Frequency response of pneumatic transmission lines (A) .....Feb. 220
How you can measure air flow. E. J. O. Brandt .....June 145
Medium vacuum as a process tool. Ormonde Bogert .....Apr. 140
Suction pickoff feeds blanks to envelope machine (PD) .....Feb. 154

Powder Metallurgy

Aluminum parts that stand 930 F (D) Dec. 16 12
Design for metal-powder parts. Talmage & Kolb .....Aug. 183
Iron-powder parts with properties similar to wrought (SP).....Dec. 30 39
Mill forms from metal powder (C) Feb. 220
Powder-metallurgy parts (D)....Oct. 7 6
Russians are pioneering in powder metallurgy (D) .....Oct. 21 10
Submicron metal powders. Freeman & Watson .....June 182

Presses

Cams rock platen in functionally styled press (PD) .....June 152
Five-motion metal-powder press (PD) June 158

Printed Circuits

Printed circuits without the etching (D) June 9
Molding printed circuits. N. L. Greenman .....Sept. 30 90

Product Development

Best setup for research and development. T. W. Jarmie.....Oct. 21 34
Can we throw it away? (D).....Sept. 9 5
Catalyst for a better product—value-analysis seminars at GE. R. E. Abbott .....Dec. 2 30
Caution: select your new product with care. Dr. W. A. Beck.....Oct. 7 30
Conference on product development in May .....Mar. 188
Here's what to expect in '58 (D) Dec. 30 5
How do you market-test a new product, without giving sample products away? Points of View.....Sept. 23 40
How has standardization affected the design of your products?—Points of View .....Oct. 21 36
How much of what you're doing will you let competitors see—Points of View .....Oct. 7 34
Industry makes room for research and development (N) .....Nov. 18 23
Is your new product doomed? I. P. Sharpe .....Sept. 9 54
Limitation on industry, use of nuclear materials slows product development (D) .....Nov. 4 9
New product ideas from the Old World (N) .....Dec. 2 21
New product trends for the year 2000 (N) .....Oct. 21 19
Pay now (for research), profit later (with new products) .....Sept. 23 32
Possibilities of special-interest groups (D) .....Sept. 23 6
President's Conference on Technical and Distribution Research (N) Sept. 9 31
Revolution in war material (D) Sept. 9 11
Sponsor groups .....Oct. 14 100
. . . with a sense of urgency (Ed) Dec. 30 17
What factors enter your decision to redesign an existing product rather than design anew?—Points of View Sept. 9 52
World's Fair flashback (N)...Dec. 16 17

Professional Trends

Are we Frankensteins? (Ed).....Mar. 133
How product planners work in Canada Sept. 9 46
Management of large R & D organizations (A) .....June 408
Minneapolis-Honeywell engineers join the UAW union (D) .....May 9
Organization and the human being. Chris Argyris .....Dec. 30 26
Raiding isn't recruiting (Ed).....Feb. 133

Publisher's Postscript

An unexpected spark.....Nov. 18 56
Don't blame the scientists....Dec. 16 52
Needed: Imagineering time ....Oct. 21 52
R & D—our secret weapon....Dec. 30 48
To save you time . . . . . Sept. 23 56
To extend your eyes and ears—Nov. 4 60
When advertising works for YOU Oct. 7 48
Where US strength really is....Dec. 2 48
Why special advertising for engineers? Sept. 9 72

Sealing

How to apply O-rings. J. G. Adiletta Aug. 176

Seals

Glass-to-metal seals. T. H. Mariner Jan. 188

Ship's pitching motion reduced with bow fins (N) ....Mar. 207

Silicon

More producers; lower cost (N).Nov. 4 14

Solar batteries (D).....Sept. 9 6

Springs

Differential springs can simulate load. G. H. Logan.....Sept. 30 110

Flat spring material—costs and stress factors. J. B. Beckwith (RS).Oct. 14 125

Functional gaging for flat springs. A. W. Ullmann .....Dec. 9 76

Reducing trial and error in compression spring design. J. J. Intintolo Jan. 206

Surge waves in compression springs. Karl Maier .....Aug. 167

Standardization

How has standardization affected the design of your products?—Points of View .....Oct. 21 36

NATO standardization still crawling (N) .....Sept. 23 27

New NEMA standards for motor starters reduce cost and space. J. R. McDermott .....June 189

Problems in standardizing electrical per unit quantities (A) .....Feb. 328

Standardize and save (N)....Sept. 30 112

Standards for filing engineering drawings (A) .....Mar. 394

The trouble with MIL specifications (P) .....Aug. 129

U.S. sharpens its time standards (N) Nov. 4 12

Steel

Another new stainless (D)....Nov. 18 13

Auto market bright for stainless (N) Nov. 25 110

Brittle fracture propagation in wide steel plates (A) .....May 422

High-temperature stainless. E. A. Loria .....Apr. 135

Hollow webbed shape from single sheet (N) .....Sept. 23 26

Low-nickel, austenitic stainless steels. L. F. Spencer .....Aug. 135

Lower prices (D).....Nov. 18 11

New route to titanium-clad steel (N) Sept. 9 16

New steels (D) .....Sept. 9 14

Pre-painted steel—report. F. R. Park Dec. 9 99

Rumanians claim nickel-free-alloy steel (D) .....Dec. 2 15

Stainless: progress on three fronts (N) Oct. 21 13

Titanium-clad steel. R. F. Domagala & others .....Sept. 16 111

When to use cold extrusion for steel parts. C. B. Grace.....Aug. 145

Where can slack-quenched steels be used? (D) .....Oct. 14 9

Stress Analysis

Aircraft structures under thermal stress (A) .....Dec. 9 181

Applicability of notch tensile test data to strength criteria (A).....May 407

Bolted assemblies — high-temperature design. Silwones & Degen..Sept. 30 79

Brittle fracture propagation in wide steel plates (A) .....May 422

Epoxy casting resins simplify three-dimensional photoelasticity. M. M. Leven .....July 135

Fabrication technique doubles bending resistance (N) .....Apr. 199

Fatigue and internal friction of aluminum (A) .....July 358

Fatigue in titanium and its alloys (A) Oct. 14 181

Fatigue life of steel tubing can be extended (D) .....Sept. 23 6

Fatigue strength of bolts. Joseph Viglione .....Mar. 203

Fatigue strength of riveted joints and lugs (A) .....Feb. 312

Friction in pipes—a wide-range nomograph. Reagan Houston .....Aug. 194

How to measure principal stresses. C. C. Perry.....Oct. 14 101

Influence of pinch fits on fatigue (A) Oct. 28 173

New low-expansion ceramic for thermal shock. Herbert Schwartz Sept. 30 70

Nickel alloys for controlled thermal expansion. E. M. Wise .....Oct. 28 68

Peening cuts stresses in plated parts. W. W. Safee.....Dec. 9 92

Photoelasticity—fast solution to practical design problems.....Dec. 9 103

Pressure or strain causes electrical resistivity change in hard elastic material (D).....July 9

Rapid weight-strength analysis of pressure vessels. R. E. Wong..Oct. 14 95

Reducing residual stresses (A).Sept. 30 178

Rupture and impact stresses in reinforced plastics (A).....Nov. 25 174

Static strength of aluminum-alloy specimens containing fatigue cracks (A) .....Feb. 341

Statistical analysis of a wear process (A) .....Feb. 312

Stiffness of shafting (A).....Sept. 30 184

Stress concentration factors. Alexander Gomza (RS) Pt 1 June 211, Pt 2 July 215

Stress cycles in planetary gears. L. E. Iversen (RS) .....Jan. 219

Stresses in large ring bearings. T. S. Williams .....Feb. 160

Stripping strength of tapped holes. Francis Kull (RS) .....Feb. 215

Thermal stress fatigue. L. P. Coffin June 175

Torsional stiffness of thin-walled shells (A) .....Feb. 325

Torsional strength of shafts (RS) Sept. 30 123

Watch out for compression loads. L. A. Yerkovich .....Dec. 9 72

When splines need stress control. D. W. Dudley .....Dec. 23 56

When stresses alter material hardness Dec. 9 105

Switches

Control switch for low-pressure applications (C) .....Sept. 30 127

Isotope switch for level control (D) Nov. 18 13

Pressure switch can be remotely controlled (SP) .....Dec. 2 40

Tilt-type mercury switches—where and when to apply them. W. E. Johnson May 159

—T—

Tangents

Golden rule .....Dec. 23 129

How to train your successor....Oct. 14 177

The inquiring mind.....July 347

Obituary for two craftsmen.....Dec. 9 166

Take your seats please.....Nov. 11 197

Those not-so-good old days....Sept. 16 181

Whistle while you work.....Aug. 314

Terminology

don't tense (Ed) .....Nov. 25 71

The talk of the universe (N)....Dec. 2 23

Testing

Automatic testing saves time, cuts labor requirements (N).....Apr. 200

Baby rockets used to test heat resistance, corrosion (N).....Dec. 30 12

Compact shock tester (PD).....May 178

Cryogenics: a hot trail to cold facts (N) .....Dec. 2 16

High-thermal test unit for missile reentry (N) .....Dec. 2 27

How does fuel burn in gravity-free outer space? (N) .....Sept. 9 16

Isotope separation by ultrasonics (N) Dec. 30 12

Metallic fillers don't affect thermal resistance (D) .....Oct. 21 6

Reactor conditions simulated in new test facility (N).....Mar. 206

Reproducible thermal shock test for porcelain enamels (D).....Dec. 2 7

Seismic mass isolates vibrator (PD) July 163

Simultaneous measurement of torque and tension (A) .....Dec. 9 181

Solar furnace gives clean heat for testing (D) .....Sept. 9 8

Sonic waves may upgrade uranium ore (N) .....Dec. 16 22

Tester for electronic testers (D) Dec. 2 10

Testing for tomorrow's Army (N) Dec. 30 21

Toughness test for titanium (N) Sept. 9 19

Transportation Aircraft Test and Support Activity (D).....Sept. 9 11

Ultrasonic tester joins production line (N) .....July 203

Ultrasonics test honeycomb bond (N) Dec. 23 89

Ultraviolet radiation sunburns products (D) .....Nov. 18 7

Textile

Asbestos from South America (D) Sept. 23 15

Carbon fibers that can be woven (D) Sept. 23 5

Rubber-bonded fibrous material (D) Sept. 23 15

Synthetic fiber felt. Gillick Jr. & Magnant .....July 178

Twin-purpose ceramic fabric (SP) Sept. 9 59

Timers

Clock-escapement mechanisms. T. K. Steele .....Jan. 179

Interval timer for ranges up to 6 hr. (C) .....Dec. 23 104

12 ways of measuring speed. Carlsten & Hellebust (MS) .....Feb. 192

Titanium

Fatigue in titanium and its alloys Oct. 14 181

Hot finish-forming titanium. Bayer & Wood .....July 146

New route to titanium-clad steel (N) Sept. 9 16

New toughness test for titanium (N) Sept. 9 19

Physical properties of titanium and its alloys (A) .....Oct. 14 181

Sintered titanium parts (SP)..Oct. 21 42

Titanium carbide. J. C. Redmond Nov. 11 84

Titanium-clad steel. R. F. Domagala & other .....Sept. 16 111

What's holding back titanium sandwich structures? (D) .....Sept. 9 5

Wrought titanium (A) .....July 370

Tolerances

Determining production tolerances (A) Dec. 9 181

Machining tolerances (RS).....May 219

Over-pin gear measurements. G. W. Michalec .....May 194

Probability applied to assembly fits. G. D. Pheil .....Nov. 25 88

Profile diagrams specify gear errors. L. S. Harris.....Oct. 14 86

7 rules simplify instrument gear specifications. W. A. Wiegand....Nov. 25 80

Tolerances never before possible (D) Dec. 2 7

Vectors simplify tolerance analysis. W. Hanka .....July 195

Transducers

Differential pressure transducer (C) Oct. 14 127

Miniature rotary transducer (SP) Dec. 16 45

Magnetostriction: a new design tool. E. M. Wise .....Jan. 162

Nickel-ferrite replaces nickel in new magnetostrictive material for ultrasonic transducers (D).....June 9

Pressure-sensitive material. D. B. Clark .....Sept. 16 106

6 applications of ultrasonic transducers (MS) .....Oct. 14 120

Transformers

One transformer—many voltages. W. P. Carpenter .....Dec. 9 89

Traveling transformer (D)....Oct. 21 10

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.

Transistors
Power transistors for switching 1 kw loads (D) ..... Mar. 9
Smaller transistors, smaller missiles (N) ..... Dec. 16 20
"Thyristor"—another kind of transistor (D) ..... Nov. 4 6
Transistor with 40 AMP switching current capacity (D) ..... July 9
Transistors vs tubes for industrial applications—report ..... Oct. 28 52

Transmissions, Electrical
Multiple-speed and takeoff transmission in sizes up to 60 hp (C). Nov. 25 125

Transmissions, Mechanical
Friction drive transports tape in dictating machine (PD) ..... Jan. 148
Gear-shift arrangement. Sigmund Rappaport (MS) ..... Apr. 188
Light-load, variable transmission (SP) Oct. 21 43
Nylon and chromium leather transmission belt (D) ..... Mar. 9
One-hand control reverses outboard (PD) ..... Sept. 16 90
Shot peened gears increase torque rating of transmission (PD) ..... Jan. 149
When to choose a non-clutch drive. A. F. Gagne Jr. ..... Apr. 194

Tubing
Molybdenum seamless tubing by cold extrusion (N) ..... Sept. 9 29
Transistors vs tubes for industrial applications—report ..... Oct. 28 52

—V—

Vacuum Melting
Pellet electrode (N) ..... Sept. 9 19
Vacuum melted alloys for forged parts. Dyrkacz & Reynolds ..... Feb. 143
World's largest vacuum-arc melting furnace (N) ..... Dec. 16 23

Valves
Air line pressure regulator (C) ... Apr. 216
Electrohydraulic servo valve (SP) Dec. 30 39
Hydraulic control valves. J. J. Pippenger II Pressure control valves Jan. 196, III Flow control valves Mar. 144, IV Directional valves.. May 167
V Valve circuits ..... July 197
Knob-controlled, panel-mounted valves (C) ..... Dec. 23 102
Reversible solenoid valves with replaceable poppet seats are ball-check controlled (C) ..... Jan. 224
Self-compensating valve (PD) .... Apr. 165
Tapered orifice valve (SP) ..... Nov. 4 42
Valve assembled with spring pins (PD) May 183

Variable-Speed Drives
Ac equipment for variable-speed drives (A) ..... Dec. 23 130
New speed reducer (D) ..... Dec. 9 9

Vibration and Shock
Cams and gears join to stop shock load. Beggs & Beggs ..... Sept. 16 84
Compact shock tester (PD) ..... May 178
Controlling vibration in rotating machinery ..... Feb. 182
How to predict performance of rubber vibration isolators. W. W. Soroka July 141
How to reduce shock loads in bearings. R. H. Carter ..... Sept. 16 72
Hydraulic vibrators. J. A. Dickie Dec. 9 94
Lightweight coupling and flexible rod reduce rotor vibration (PD) .... Jan. 157
Nylon batting used for vibration, thermal insulation (C) ..... May 232
Seismic mass isolates vibrator (PD) July 163
Selection of shock and vibration isolators (A) ..... Oct. 14 181
Shock resistance of a high order specified for many types of equipment (D) ..... Sept. 30 9
Surge waves in compression springs. Karl Maier ..... Aug. 167

—W—

Water Supply
Salt water to fresh (N) ..... Oct. 7 23

Welding
Compact welding gun (PD) ..... Aug. 152
Continuously fed welding wire electrode has magnetically coated flux (N) ..... Mar. 209
Magnesium castings can be welded without distortion. Mansfield & Gesualdo ..... Sept. 16 94
Redesigning castings to weldments. O. W. Blodgett ..... Mar. 135
Stamped parts reduce welding (PD) Mar. 161
Stud welding floor plates lowers cost of coke cars (PD) ..... Mar. 157
Welded frame on press, weighs less, costs less (PD) ..... Oct. 28 64
Welding design for improved vibration control (A) ..... Oct. 28 168

SILWONES, S. S. & R. A. Degen—Design of bolted assemblies..Sept. 30 79
SOROKA, Walter W.—Vibration isolators .....July 141
SPENCER, L. F.—Low-nickel, austenitic stainless steels .....Aug. 135
SPOTTS, M. F.—Shortcut to critical frequencies of torsional systems Sept. 16 110
STEELE, T. K.—Clock-escapement mechanisms .....Jan. 179
STEWART, H. L. & J. M. Moritz—Compressed air for push or pull Oct. 14 72
STRAND, Walter—13 ways to couple fractional-horsepower motors Sept. 30 120
STRASSER, Federico—Taper pins—17 ways to retain them positively Nov. 11 122
20 tamper-proof fasteners.....July 176
SUSSMAN, Philip S.—Pre-production engineering . . . by committee..May 150

TABER, Arthur W.—Choosing equipment for drawing reproduction..Jan. 135
TALMAGE, Robert & John Kolb—Design for metal-powder parts.....Aug. 182
TANGERMAN, E. J.—Committee engineers profit into price.....May 144
TASHIRO, Shigeki—Point of View..Dec. 2 38
TEAGUE, James—The industrial designer—is he friend or foe?..Oct. 7 28
TEICHMANN, Otmar E.—Analysis and design of air motors.....Feb. 167
THALNER, Robert R.—Point of View Oct. 7 34
THOMAS, L. E. Jr.—Point of View Oct.7 34
TIPLITZ, Charles—Power capacity of spur gears .....Aug. 215
TITLEMAN, Morton S.—Learning curves—key to better labor estimates..Nov. 18 36

ULLMANN, A. W.—Functional gaging for flat springs .....Dec. 9 76
URBAS, Ernest J.—Spherical swivel seat press formed in five operations..May 204
UREY, Dr. Harold C.—Point of View Dec. 30 37

VAN ATTA, Dr. Lester C.—Point of View .....Nov. 4 39
VANDEN BERG, R. V.—Color and textures for aluminum.....Sept. 30 101
VIGLIONE, Joseph—Fatigue strength of bolts .....Mar. 203

WAGNER, R. E.—Gaskets that are sprayed .....Oct. 14 90
WATSON, J. H. L. & M. W. Freeman—Submicron metal powder.....June 182
WHITE, R. H.—Point of View....Oct. 21 37
WIEGAND, William A.—7 rules simplify instrument gear specifications Nov. 25 80
WILDMANN, M. & J. S. Ausman—Lubricating with air—How to design hydrodynamic gas bearings....Nov. 25 99
WILLIAMS, Thomas Stone—Stresses in large ring bearings.....Feb. 160
WILLIAMS, William A.—How much crown does a pulley need?.....June 185
WISE, Edmund M.—Magnetostriction: a new design tool.....Jan. 162
WISE, E. M.—Nickel alloys for controlled thermal expansion....Oct. 28 68
WONG, R. E.—Rapid weight-strength analysis of pressure vessels...Oct. 14 95
WOOD, W. W. & J. L. Bayer—Hot finish-forming Ti .....July 146
WORLEY, Will J.—Short-cut for powers of numbers.....May 202
WORLEY, W. J. & F. D. Breuer—Elliptic-type closed curves .....Aug. 141
WRIGHT, W. O.—How to lubricate ways Dec. 9 114, Dec. 23 92
WROTEN, W. L.—Nitride-bonded silicon carbide .....Feb. 135
WURZEL, Hugo—Grooves for retaining ring assemblies.....Jan. 158

YERKOVICH, L. A.—Watch out for compression loads .....Dec. 9 72
YOUNGS, R. A. & J. C. Heymann—Powdered glass gives mold for stronger castings .....Oct. 14 68

ZANETTI, Dr. Giulio—Point of View Dec. 2 38

EDITORIAL CONTENT FOR DESIGN DIGEST ISSUE —Mid-October 1957

SECTION—A GENERAL ENGINEERING . . .

Economic Lot Size for Manufacture *by Edward C. Varnum* A2
Recording Instruments for Dynamic Measurements *by John L. Harned* A4
Filing Equipment Standards for Engineering Drawings *by Alan G. Negus* A8
Limits and Fits *by H. G. Conway* A11
Measuring; the Cost of Quality *by Lad J. Bayer* A14
Mechanical Assembly Equipment— Economic Considerations *by G. R. Fitzgerald* A16
Instruments and Techniques for Analyzing Products *by C. M. Albright, Jr.* A18
Realistic Tolerances *by Garmon D. Simmons* A20
Commercially Available Analog-to-Digital Converters A22
Standards For Surface Irregularities A25
Graphic Assembly Drawings *by Frederick Jantz* A28
Conversions in English and Metric Systems *by H. A. Magnus* A30
New Books 38

SECTION—B METALS AND ALLOYS . . .

Design Principles for Metal Properties *by Dr. C. Zener* B2
Titanium-Carbide Cermets for High Temperature Applications *by K. Pfaffinger, H. Blumenthal, and F. W. Glaser* B6
Mechanical Properties of Nickel Alloys at Low Temperatures B9
Alloys: Compositions and Uses B10
Thermal Expansion Coefficients for 51 Metals *by W. A. Tucker* B12
Aluminum Laminates for Structural Applications *by J. J. Saunders and H. R. Merriman* B14
Steels and Tool Bits Modified with Boron B15
Vacuum Metallurgy B18
Cost Factors of Machines Parts *by L. E. Gibbs and L. G. Simon* B20
Relative Cost and Machinability of Carbon Steels and Alloy Steels *by Dominic Mascio* B21
Static Properties of High Strength Steel *by E. P. Klier, B. B. Muvdi, and G. Sachs* B24
New Books A46

SECTION—C NONMETALLIC MATERIALS AND FINISHES . . .

Protecting Metals with Inert Barriers C2
Oil and Grease Lubrication of Antifriction Bearings *by C. R. Gillette* C6
Applications and Treatments for Felts C8
Designing with Nylon *by W. C. Warriner and A. J. Cheney* C11
Polyurethane Rubber for Abrasion Resistance, Energy Absorption, and Vibration Dampening *by G. H. Gates and W. M. Larson* C16
Properties and Uses of Industrial Crystals *by Stephen Hahn* C18
Properties and Applications of Silicon Rubber *by S. A. Braley, Jr.* C22
Factors Influencing Wear and Friction of Solid Film Lubricants *by R. E. Crump* C24
Plastics: Properties and Applications C28
Some Characteristics of Butyl Rubber C31
New Books B58

SECTION—D FABRICATION PROCESSES AND PRODUCTION

Cold Extrusion of Titanium *by A. M. Sabroff, O. J. Huber, and P. D. Frost* D2
Casting Properties of Ferrous and Nonferrous Alloys D6
Low Temperature Working Strengthens Stainless Steel *by V. N. Krivobok and C. R. Mayne* D8
Abrasive Belts: For the Removal of Metal *by J. K. McLaughlin* D8a
Plastic Faced Dies for Metal-forming *by J. Delmonte* D9
Diecasting vs Machining *by H. K. Barton* D10
Electroforming D14
Tap-drill and Tap Selection *by Warren G. Ogden, Jr.* D16
Designing Screw Machine Parts *by Earl A. Theroux* D20
New Books C62

SECTION—E POWER TRANSMISSION . . .

Transmission of Power by Torque Converters *by H. L. Willke* E2
Centrifugal Clutches for Motor Drives E5
Friction Materials for Power Transmission E8
Lubrication of Roller Chains E10
Formula for Epicyclic Gear Train of Large Reduction *by M. F. Spotts* E12
Power Absorption Devices E13
Worm Efficiency Nomographs E16
WR^2 for Flywheel Effect E18
Design and Application of Spring Clutches E20
Nomograph for Relating Values of Force-Speed-Torque-Horsepower *by Leo Fiderer* E23
Bead Chains for Light Service *by Bernard Wasko* E24
Belts for Power Transmission E26
New Books D44

SECTION—F MECHANICAL PARTS AND DESIGN ANALYSIS . . .

Computing Mechanisms—I F2
Computing Mechanisms—II F4
Rectangular Strength and Stiffness in Bending of Structural Metals F6
Material Recommendations for Special Bearing Applications *by William Blinder* F7
Characteristics, Uses and Limitations of Gaskets F10
Metal Gasket Design F12
Determining Oscillatory Accelerations *by Joseph F. Sodaro* F14
Deflections of Cantilever Beams with Changing Cross Sections *by W. R. Leopold* F15
Design Chart for Maximum Tangential Stress in Thick-walled Cylinders *by T. Ranov* F18
Operation and Characteristics of Thermostats for Engine Cooling *by S. H. Blazey* F20
Formability Index for Minimum Bend Radius *by William W. Wood* F23
Simplified Graphical Integration for Solution of Beam Problems *by W. L. Vaughan* F26
Radius of Curvature of Parabolic Cams *by Rudolph Gruenberg* F28
G Loading of Rotating Bodies *by Carl P. Nachod* F30
Designing for Vibration and Shock Resistance *by T. M. Billings* F31
Natural Frequencies of Beams and Design for Shock and Vibration *by J. J. Kerley, Jr.* F34
17 Ways of Testing Springs *by C. J. McClintock* F36
Water Lubricated Bearings *by Stanley Abramovitz* F38
Sleeve Bearing Alignment *by R. J. Sollohub* F41
Unusual Applications of Miniature Bearings *by R. H. Carter* F42
Proper Hole Design Can Reduce Part Cost *by Fred Rogers* F44
New Books E96

SECTION—G FASTENING AND JOINING

Dimensional Standardization of Semi-tubular Rivets...G2
Cost of Fastening Assembly Operations...G4
Countersinks in Thin Plates *by Mark Levine*...G5
Sheet Metal Seams and Joints *by W. C. Mills*...G8
Sheet Metal Joints for Cylinders and Boxes *by W. C. Mills*...G10
Hinges for Plastic Containers *by W. Bruce Brown*...G12
Ultrasonic Soldering, Brazing and Welding *by J. Byron Jones and William C. Potthoff*...G14
Stationary Wave Soldering of Printed Circuits *by R. Strauss and A. F. C. Barnes*...G17
Hole Sizes for Tapping Screws...G18
Screw-holding Power of Polyester Laminates *by R. R. Dixon*...G22
Adhesives for High-temperature Applications *by William Bandaruk*...G25
Design and Techniques for Arc Welding Titanium *by R. Meredith and B. L. Baird*...G28
Adhesives, Solders and Fluxes for Electronic Parts...G32
Quick-release Fasteners *by Mark Levine*...G34
New Books...F82

SECTION—H MOTORS, ENGINES, AND CONTROLS . . .

Characteristics of Electric Motor Braking *by John C. Ponstingl*...H2
Characteristics and Advantages of Free-Piston Engines *by A. F. Underwood*...H4
Selecting Motors for Fans and Centrifugal Pumps *by C. G. Veinott*...H8
How to Improve Servo Operation...H10
Design of High-speed Diesel Engine *by E. Chatterton*...H12
Characteristics of Industrial Switching Devices...H17
Fractional Horsepower Motors *by Sidney Davis*...H18
Drivers for Heavy-duty Compressors...H20
Reluctance Motors for Adjustable Frequency Drives *by C. G. Helmick and A. T. Bacheler*...H22
Characteristics of Ramjet Engines *by Arthur N. Thomas, Jr.*...H26
New Books...G78

SECTION—I ELECTRICAL AND ELECTRONIC COMPONENTS . . .

Encapsulated Relays *by O. M. Hovgaard*...I2
Cooling Miniaturized Electronic Equipment *by James P. Welsh*...I4
Potentiometers—Selection and Applications...I6a
Switching: Transistors vs Relays *by Ralph B. Brown and Ralph H. Beter*...I7
Electrical Terminal Connections *by Federico Strasser*...I10
Hermetically Sealed Terminals *by R. F. Squires*...I12
Semiconductor Power Rectifiers...I14
Resistance-reactance Nomograph *by Hallan E. Goldstine*...I18
Power Transistors for Control *by Herbert L. Aronson*...I20
New Books...H56

SECTION—J HYDRAULIC AND PNEUMATIC EQUIPMENT . . .

Pneumatic Transmission Line Frequency Response *by R. P. Sandell and N. H. Ceaglske*...J2
Friction Characteristics for Hydraulic Seals *by Robert W. Carlson*...J6
Unevenly Underlapped Four-way Hydraulic Servo Valves *by Tsun-Ying Feng*...J7
High Vacuum Pumps *by Z Dobrowolksi*...J10
Pressure Losses in Flexible Metal Tubing *by C. M. Daniels*...J13
Composite Symbols for Fluid Power...J16
Centrifugal Pump Selection *by I. J. Karassik and R. Carter*...J17
Measuring Mass Flow *by George T. Gebhardt*...J20
Effect of Back Pressure on Hydraulic Valves *by J. J. Pippenger*...J24
Tube Selection...J27
New Books...194

NOW four reprints of Product Engineering articles for a DOLLAR

Demand for some *Product Engineering* articles is so persistent that they have been made available as reprints through our Reader Service Dept. Here are typical titles, with prices for single copies. Quantities of 100 or more may be had at reduced prices.

As long as the current supply lasts, any four of the reprints listed here may be obtained for a dollar. On the order form at the bottom of this page, list the titles you want by number and the quantity, and enclose $1 (check, stamps, money order) for each four reprints.

1. Science and Engineering Today and Tomorrow

Past and present scientific achievements and growth of research in USA. (January 1955) 35¢

2. Design Developments in Machine Tool

How designers of tools solve problems of construction, power transmission, and control. (November 1955) 25¢

3. Starting Methods for Three-Phase Motors

Where and how to apply full-voltage, reduced-voltage, auto-transformer and part-winding methods. (February 1956) 25¢

4. Nuclear Reactors

New problems posed by nuclear reactions in materials, pumps, valves, seals, bearing and lubrication, instruments and controls. (April 1956) 30¢

5. Plastics for Structural Uses

New developments in plastics for load carrying applications. (June 1956) 25¢

6. Functional Design of Hydraulic Systems

Ten principles for effective design of simple or complex systems. (July 1956) 25¢

7. Photostress

New technique for photoelastic stress analysis. Measures surface strains on actual parts. (September 1956) 25¢

8. Why Bearings Fail

The most common causes and remedies; for sliding and rolling bearings. (October 1956) 25¢

9. Colored Finishes for Copper

Finishes obtainable through combinations of chemical conversion and mechanical treatment. (December 1956) 25¢

10. Analysis and Design of Air Motors

A comprehensive study and design analysis of flow through vane air motors. (February 1956) 25¢

11. Toward a New Design Philosophy

Eight articles, with case studies, highlighting guideposts for tomorrow's engineering; how research and development are coordinated with design. (May 1957) 50¢

12. Color and Textures for Aluminum

How texture and color are added to aluminum surfaces; metallurgical finishes and coloring methods. (September 30, 1957) 25¢

13. Lubricating With Air

How to design hydrodynamic gas bearings, and latest research on gas bearings from a cooperative program sponsored by eleven government agencies. (November 25, 1957) 25¢

14. Pre-Painted Steel

Metal preparation; how to choose a paint; paints available. (December 9, 1957) 25¢
